which bury so many once famous names under deep layers of forgetfulness are raising Matthias Joseph Scheeben to an eminence reached by very few scholars Time is the judge of all achievements and has pronounced its verdict that Scheeben is the greatest theologian who has written in the German language The reason for his importance is not hard to find Scheeben is the chief theologian of the supernatural economy of the world The intellectual blight known as rationalism had spread widely in the nineteenth century and had made disastrous inroads even in Christian circles Although preliminary battles waged by Catholics who were turning back the unholy invasion Scheeben was the champion who finally and decisively drove the enemy out of theology From the very outset of his theological career Scheeben had cherished the ambition of making the drab naturalistic world glow again in the light and beauty of grace of bringing back to the awareness of men the glorious truth that they are God's children In the first of his major books *Nature and Grace* he describes the supernatural as a sharing in the nature of God This same theme the splendor of our supernatural life is the leading idea of all his works He thought that a deep appreciation of the mysteries revealed by God was so important that he consecrated the tireless powers of his genius to the task of bringing out their beauty and force and of emphasizing their meaning for the daily life of man He insisted that these mysteries are the richest treasure of our spiritual inheritance and that theology is the inspiration of the fullest life open to use supernatural life with Christ and in Christ Scheeben's masterly theological synthesis is best proposed in *The Mysteries of Christianity* his most original work but was clearly formulated from the beginning of his literary activity in *Nature and Grace* the book of his energetic youth

The Nature of Suffering and the Goals of Medicine Eric J. Cassell, 2004-03-25 This is a revised and expanded edition of a classic in palliative medicine originally published in 1991 With three added chapters and a new preface summarizing our progress in the area of pain management this is a must have for those in palliative medicine and hospice care The obligation of physicians to relieve human suffering stretches back into antiquity But what exactly is suffering One patient with metastatic cancer of the stomach from which he knew he would shortly die said he was not suffering Another someone who had been operated on for a minor problem in little pain and not seemingly distressed said that even coming into the hospital had been a source of pain and not suffering With such varied responses to the problem of suffering inevitable questions arise Is it the doctor's responsibility to treat the disease or the patient And what is the relationship between suffering and the goals of medicine According to Dr Eric Cassell these are crucial questions but unfortunately have remained only queries void of adequate solutions It is time for the sick person Cassell believes to be not merely an important concern for physicians but the central focus of medicine With this in mind Cassell argues for an understanding of what changes should be made in order to successfully treat the sick while alleviating suffering and how to actually go about making these changes with the methods and training techniques firmly rooted in the doctor's relationship with the patient Dr Cassell offers an incisive critique of the approach of modern medicine Drawing on a number of evocative patient narratives he writes that the goal of medicine must be to treat an individual's suffering and not just the disease In

addition Cassell's thoughtful and incisive argument will appeal to psychologists and psychiatrists interested in the nature of pain and suffering

**Reading Nature** John Seibert Farnsworth, 2025-03-01 Reading Nature highlights the ten books that most influenced the scope and direction of literary natural history in the United States. It explores how American nature writing came to focus on the deep observation of wild landscapes and how the genre evolved over 163 years beginning with the publication of Henry David Thoreau's *Walden* in 1854. The volume also examines Mary Austin's *Land of Little Rain* 1903, John Burroughs's *Ways of Nature* 1905, Aldo Leopold's *A Sand County Almanac* 1949, Rachel Carson's *The Sea around Us* 1951, Edward Abbey's *Desert Solitaire* 1968, Annie Dillard's *Pilgrim at Tinker Creek* 1974, Terry Tempest Williams's *Refuge* 1991, Robin Wall Kimmerer's *Braiding Sweetgrass* 2013, and J. Drew Lanham's *The Home Place* 2016. This book features a series of close readings exploring how these authors transformed popular understanding of the natural world.

**Hidden Nature** Alick Bartholomew, 2014-01-23 Austrian naturalist Viktor Schauberger 1885-1958 was far ahead of his time. From his unusually detailed observations of the natural world, he pioneered a completely new understanding of how nature works. He also foresaw and tried to warn against the global waste and ecological destruction of our age. This book describes and explains Schauberger's insights in contemporary accessible language. His remarkable discoveries, which address issues such as sick water, ailing forests, climate change, and above all, renewable energy, have dramatic implications for how we should work with nature and its resources.

**Woman and Nature** Susan Griffin, 2016-08-22 In this famously provocative cornerstone of feminist literature, Susan Griffin explores the identification of women with the earth, both as sustenance for humanity and as victim of male rage. Starting from Plato's fateful division of the world into spirit and matter, her analysis of how patriarchal Western philosophy and religion have used language and science to bolster their power over both women and nature is brilliant and persuasive, coming alive in poetic prose. Griffin draws on an astonishing range of sources, from timbering manuals to medical texts to Scripture and classical literature, in showing how destructive has been the impulse to disembodiment the human soul and how the long-separated might once more be rejoined. Poet Adrienne Rich calls *Woman and Nature* perhaps the most extraordinary nonfiction work to have merged from the matrix of contemporary female consciousness: a fusion of patriarchal science, ecology, female history, and feminism, written by a poet who has created a new form for her vision. The book has the impact of a great film or a fresco, yet it is intimately personal, touching to the quick of woman's experience.

**Encyclopedia of Religion and Nature** Bron Taylor, Jeffrey Kaplan, 2005-01-01 No Marketing Blurb

**Nature's Secret World** James Harrison, 1984 Looks at coloration, hibernation, special adaptations, and snakes, fungi, marsupials, insects, octopuses, birds, manatees, and beavers.

**Queer Gothic** George E. Haggerty, 2006 George Haggerty examines the ways in which gothic fiction centers on loss as the foreclosure of homoerotic possibility and the relationship between transgressive sexual behaviors and a range of religious behaviors understood as Catholic.
