Municipalities ,1915 **California Municipalities** Haven A. Mason,William James Locke,1915 **The River Bends in Time** Mazis, Glen,2015-03-12 The River Bends in Time follows the flow of time and the river as it unwinds in a small town in Pennsylvania along the banks of the Susquehanna The narrator experiences those quiet moments of joy when ducks come from the sky to skim the water s edge or in the height of a Nor easter as he walks through the forest filling with snow but also the sadness of a neighbor s dying or love breaking apart The river flows always bending and changing like discovering the love of a mate that one joins with becoming partners who run together under flying snow geese or dig a pond behind a two hundred year old house Yet the postmodern world seems lost without a past A bout with colon cancer brings a renewed sense of the preciousness of each day and how the culture is wrong in its headlong race towards the future The book ends with moments that resonate with the past in a state of continual affirming discovery [The Many Lives of James Lovelock](#) Jonathan Watts,2025-09-09 Utterly fascinating a beautifully braided account of the life of a maverick prophetic genius Robert MacFarlane Based on in depth interviews with James Lovelock and unprecedented access to his personal archive The Many Lives of James Lovelock is a definitive revelatory biography of a fascinating sometimes contradictory man James Lovelock is best known as the father of Gaia Theory the idea that life on Earth is a self sustaining system in which organisms interact with their environments to maintain a habitable ecosystem But he also made many other profound discoveries and led a life as exciting and unusual as any other major figure of the twentieth century Lovelock s life was a chronicle of twentieth century science and somehow he seemed to have a hand in much of it During the Second World War he worked at the National Medical Research Institute where his life long interest in chemical tracing began In the 1960s he worked at NASA He worked for MI5 and MI6 during the Cold War He was a science advisor to the oil giant Shell who he warned as early as 1966 that fossil fuels were causing serious harm to the environment He invented the technology that found the hole in the Ozone layer And all of this shaped Gaia Theory a theory that could not have been developed without the collaboration of two important women in his life Drawing together the many influences which shaped his life and thinking The Many Lives of James Lovelock is a unique biography of one of the most fascinating scientists of the modern age **Golden Days for Boys and Girls** ,1898
