Public Relations, Activism, and Social Change Kristin Demetrious, 2013. This book draws significant new meaning to the inter relationships of public relations and social change through a number of international case studies and rebuilds knowledge around alternative communicative practices that are ethical, sustainable, and effective. Demetrious offers a critical description of the dominant model of public relations used in the twentieth century, showing that PR was characterized as arrogant, unethical, and politically offensive in ways that have weakened its professional credibility. She offers a principled approach that avoids the contradictions and flawed coherences of essentialist public relations and instead represents an important ethical reorientation in the communicative fields.
