The Magic of Chess

Tactics Karsten Muller, Claus Dieter Meyer, 2017-09-05 Chess is 99% tactics So to be a good chess player you have to spend a lot of your training time on tactics Although basic tactics are explained in a number of good books complicated tactics the kind that separate tournament winners from the pack require intuition imagination and precision The Magic of Chess Tactics helps you develop these qualities Aimed primarily at aspiring chess players from club to master level who seriously want to improve their chess understanding The Magic of Chess Tactics provides examples selected for both their entertainment and instructional value as well as detailed explanations and exercises Claus Dieter Meyer chess author and FIDE Master is a well known analyst and professional chess trainer Karsten Muller is an International Grandmaster and co author along with Frank Lamprecht of the highly acclaimed *Secrets of Pawn Endings* and *Fundamental Chess Endings* I have come to realise that there are basically two types of chess tactics First simple kinds of combinations you need to know when you start to play chess I still believe they are the basis of everything Things that computers see in a half second But the book is not about them For those simple tactics old Koblenz books are more than enough This book is about complicated chess tactics the kind you sometimes need hours of analysis just to discover the truth of the position It's hard to see and calculate perfectly on the board one needs intuition imagination and precision It's not easy to develop these qualities but I believe that the present book full of examples and high quality analyses will help you achieve that objective Welcome to the magical world of tactics From the Foreword by Alexei Shirov
