governments seemed to be adopting policies that could reduce this historical trend. Many of these efforts however were blocked or reversed by the COVID 19 pandemic which both exposed the persistence of historical trends and contributed to the emergency of new forms of inequality in the region. The different chapters in this contributed volume adopt a multidimensional intersectional perspective to analyze both the persistence and the emergency of social devices of production and reproduction of inequalities in the diverse Latin American and Caribbean temporal spatialities. The issues analyzed in the different chapters revolve around four main axes: a persistence of generational and intergenerational inequalities, b structural gender inequality, c intertwined social inequalities race class and social structure and d historical and economic dimension of inequality.

Persistence and Emergencies of Inequalities in Latin America: A Multidimensional Approach will be of interest to researchers interested in the study of social inequality and social justice in different fields of the human and social sciences such as sociology, political science, history, economics, anthropology and education. It will also be a valuable tool for policy makers and social activists engaged in the discussion, advocacy and implementation of public policies aimed at reducing social inequalities.

Education Systems in Historical, Cultural, and Sociological Perspectives Daniel Tröhler, Ragnhild Barbu, 2012-03-26. For nearly half a century research on education systems has been increasingly popular. However, this popularity was long restricted primarily to internationally linked policy makers and education planners often backed up by international organizations such as the OECD but also by governmental or para governmental organizations within the individual countries. These institutional affiliations provided education research with a specific character that often centres on notions such as excellence, efficiency or standards. The specific comparative character of this policy driven research agenda triggered the development of suitable research techniques such as comparative statistics and pertinent sub disciplines such as cognitive psychology. Backed up by powerful global institutions this agenda purported to be rather unique and it tended to ignore the cultural complexity of the educational field and those research approaches that address this complexity. This volume includes different historical, cultural and sociological approaches to the education systems and to questions as to how research on education systems can be undertaken beyond the parameters of the existing research agenda. They demonstrate how pertinent problems of research on education systems can only be tackled taking an international and interdisciplinary approach with regard to both research questions and methods concerning education.

systems **Cincuenta años de educación en Argentina** Norberto Fernández Lamarra, Lucila Arrigazzi Jallade, Marisa Álvarez, 2025-05-02 En 1968 se publicó el estudio Educación recursos humanos y desarrollo económico social elaborado por el Sector Educación del Consejo Nacional de Desarrollo bajo la dirección de Norberto Fernández Lamarra. Se trata de la primera investigación realizada en Argentina sobre el sistema educativo y sentó las bases para el planeamiento de la educación nacional. Cincuenta años de educación en Argentina es un proyecto surgido del trabajo con colegas del NIFEDE y de la UNTREF con el invaluable aporte de Lucila Arrigazzi Jallade y Marisa Álvarez; el compromiso de los demás autores y la revisión crítica de Cristian Pérez Centeno y Pablo García UNTREF. El libro tiene como referencia el estudio del CONADE en cuanto al vínculo entre la producción de conocimiento, la utilización de múltiples fuentes y la formulación de políticas a través de procesos sistémicos. Las dificultades creadas por la pandemia de COVID 19 han demorado la publicación, pero igualmente consideramos que será un aporte significativo para pensar, investigar, debatir, diseñar, planificar y evaluar políticas y estrategias para el futuro de nuestra educación.

Examining Educational Policy in Latin America Axel Rivas, 2021-12-30 This book synthesizes and analyzes the complex map of educational reforms in Latin America in the first two decades of the 21st century. The book offers insights into the agendas, processes and political economy of educational reforms in Argentina, Brazil, Chile, Colombia, Mexico and Peru. Written by renowned contributors from each country, chapters present systematic critical and reflective accounts of an intense period of education reforms. The book fills a gap in educational research and provides a systematic study that compares the cases analyzed. The first broad comparative collection of its kind, the book is well suited to courses in international and comparative education policy.

Desconectados Matías Busso, Marina Bassi, Sergio Urzúa, Jaime Vargas, 2012-01-01 Mediante el análisis de información de primera mano recolectada a través de dos grandes encuestas, una sobre trayectorias y habilidades conducida en Chile y Argentina en 2008 y 2010 respectivamente, y otra sobre demanda de habilidades realizada entre empresarios de Argentina, Brasil y Chile en 2010, los autores muestran que se requieren políticas educativas urgentes no solo para abordar el problema de la calidad de la educación, sino de la pertinencia de la misma cuando se trata de facilitar las transiciones de los jóvenes al mundo del trabajo.

La construcción del campo de la Economía de la Educación en Argentina Graciela Riquelme, 2023-09-01 En su extensa introducción, la obra define el campo en sus diversas dimensiones: la función productiva de la educación, el valor de la educación para proporcionar a los individuos acceso a bienes y servicios privados y sociales, la distribución de la educación para satisfacer la demanda social, la relación de la educación con la acumulación de capital a través de su contribución a la productividad y al cambio tecnológico, y por tanto al crecimiento económico, y la distribución de los recursos para la educación entre los distintos grupos de la sociedad con sus implicaciones para el acceso al poder, el ingreso y la riqueza. También ofrece una extensa historia del campo en Argentina, mostrando cómo ha crecido desde sus modestos orígenes en los sesenta hasta

un inventario hoy de más de mil artículos de revistas libros y estudios en todas las dimensiones del campo La contribución es sobresaliente tanto desde el punto de vista histórico como metodológico evaluando las influencias educativas económicas y políticas desde dentro de Argentina y desde el extranjero *Apuntes sobre derecho político argentino* Laurentino Olascoaga,1914 **The Age of Youth in Argentina** Valeria Manzano,2014 Age of Youth in Argentina Culture Politics and Sexuality from Peron to Videla *Desarrollo mas allá de la economía* Inter-American Development Bank,2000 Cómo llega América Latina al siglo XXI Demografía amenaza u oportunidad para América Latina Geografía y desarrollo en América Latina Instituciones políticas y gestión pública en América Latina **IB World Schools Yearbook 2013** Jonathan Barnes,2012 There are currently more than 3600 IB World Schools and this number is growing annually The IB World Schools Yearbook is the official guide to schools authorised to offer the International Baccalaureate Primary Years Middle Years Diploma and Programmes It tells you where the schools are and what they offer and provides up to date information about the IB programmes and the International Baccalaureate This is an ideal reference for schools administration parents and education ministries worldwide as it provides a comprehensive reference of IB World Schools for quick and easy access raises the profile of schools within the IB World School community and beyond reinforces a sense of belonging to the IB World School community **Educational Assessment in Latin America** Sue Swaffield,Sally Thomas,2019-07-23 This collection presents educational assessment research from Latin America adding to a relatively small but growing body of research considering educational assessment and evaluation issues in this large region The predominance of Chile reflects its early highly centralized education system and the fact that it adopted national testing before other Latin American countries It was also an early participant in international assessment programmes Other countries have followed the trend of implementing national testing and to a lesser extent participating in international surveys The complementary development of technical expertise in quantitative research methods has enabled extensive analysis of the large data sets generated by these testing and assessment programmes Taken together the evidence reported provides a means not only of reviewing educational quality issues in Latin America but also of facilitating comparisons that allow the context specificity of equivalent research conducted in western developed countries to be considered The chapters in this book were originally published as a special issue of Assessment in Education Principles Policy and Practice
