**Rescue of Business in Europe** Bob Wessels, Stephan Madaus, European Law Institute, 2020-01-30 This edited volume is based on the European Law Institute's project The Rescue of Business in Insolvency Law which ran from 2013 to 2016 The project sought to investigate and articulate the essential features of well functioning procedures for the rescue of distressed but viable businesses Although the focus was primarily on the design and implementation of formal procedures that is those provided by law the project also required consideration of the interaction between such procedures and informal solutions to distress given the obvious cost advantages of the latter The ELI project was not confined exclusively to restructurings since these are only one possible route to maximising the value of a distressed but viable business an auction procedure in which the business is sold on a going concern basis to a new owner is one obvious alternative The ELI project encompasses various aspects of both public constitutional law and insolvency law that may have a bearing on the functionality of formal restructuring procedures

**GDPR and Biobanking** Santa Slokenberga, Olga Tzortzatou, Jane Reichel, 2021-01-05 This open access book focuses on the discrepancies in biobank research regulations that are among the most significant hurdles to effective research collaboration The General Data Protection Regulation GDPR has established stringent requirements for the processing of health and genetic data while simultaneously allowing considerable multi level exceptions for the purposes of scientific research In addition to directly applicable exceptions the GDPR places the regulatory responsibility for further defining how the Member States strike a balance between the individuals rights and the public interest in research within their national legal orders Since Member States approaches to the trade off between data subjects rights on the one hand and appropriate safeguards on the other differ according to their ethical and legal traditions their data protection requirements for research also differ considerably This study takes a comprehensive

approach to determine how the GDPR affects regulatory regimes on the use of personal data in biobanking research with a particular focus on the balance between individuals rights public interest and scientific research In this regard it has two main goals first to scrutinize the GDPR research regime its objective and constitutive elements the impact it has on biobanking and its role in a changing EU landscape post Brexit and second to examine how various exceptions have been operationalized nationally and what challenges and opportunities this diversification entails The book not only captures the complexity GDPR creates for biobanking but also sheds light on various approaches to tackling the corresponding challenges It offers the first comprehensive analysis of GDPR for biobanking and the most up to date overview of the national biobank regulatory frameworks in Europe

Commission The consensus is that the relatively light regulation of the UK labour market is advantageous and that problems of social disadvantage and structural unemployment are better addressed by measures aimed at tackling poor skills and social inequality rather than changing labour law The report therefore recommends that efforts at EU level should focus on the promotion and sharing of good practice rather than the introduction of new legislation      **European Business** Neil Harris, 1999-11-11 European Business 2nd edition explores the interaction between European business and their environment using up to date case studies Drawing upon a range of disciplines including economics organizational behaviour finance and business strategy it explores how and why modern businesses behave as they do and how and why the business environment is changing A central theme of this substantially updated second edition is the position of Europe within the global economy Also comprehensively examined is the developing nature of the European Union and the movement towards market economies in Central and Eastern Europe
