Transition in Europe and Central Asia Alexander Fleming, Lajos Bokros, Cari Votava, 2001-01-01 This book contains 21 papers focusing on a wide range of issues concerning financial sector transition in the countries of Europe and Central Asia ECA It places the transition economies in the context of recent and prospective developments in global financial markets This book also evaluates the experience of the last 10 years and reviews the progress from a command financial system to a market based one identifying some of the key characteristics of the financial transition *Decision Making: Recent Developments and Worldwide Applications* Stelios H. Zanakis, Georgios Doukidis, Constantin Zopounidis, 2013-04-17 This chapter describes a study conducted at the Swinburne University of Technology in Australia in their School of Business The study was to explore the applicability of a judgment analytic decision support system to the assessment of the likelihood of an applicant being selected for admission to the School's Graduate Certificate in Business Administration GCBA program The likelihood of a program administrator selecting a particular applicant is directly linked to the assessment of the likelihood of that applicant's success in the GCBA program The purpose of this study in effect was to analyze the administrative judgment process in assessment of an applicant's likelihood of success in the program THE PROCESS OF HUMAN JUDGMENT Human judgment is a process through which an individual uses social information to make decisions The social information is obtained from an individual's environment and is interpreted through the individual's cognitive image of the environment The cognitive image provides a representation of the environment based on past experiences and training and essentially predisposes the person to respond to social information in predictable ways An individual's policies or beliefs about the environment represent these patterns Human judgments are based then upon one's interpretation of available information They are probability statements about one's environment and how one reacts to it This condition leads to the human judgment process being inherently limited It is fundamentally a covert process It is seldom possible for an individual to accurately describe his or her judgment process accurately Information India S. Fernando,2009 Business Ethics An Indian Perspective provides a comprehensive coverage of the theories of business ethics and emphasizes the importance of ethical principles in overcoming moral dilemmas in the business world Using a large number of India centric case studies and examples this book helps readers develop the reasoning and analytical skills needed to apply ethical concepts to business **Economic Developments In India : Monthly Update, Volume -59 Analysis, Reports, Policy Documents** Editors : Raj Kapila & Uma Kapila,2003 **Financialization and the Economy** Agata Gemzik-Salwach,Krzysztof Opolski,2017-07-14 There can be no doubt that the influence of the financial sphere has intensified rapidly in recent years but there is much debate about the effect of that influence The aftermath of the Financial

Crisis has led to numerous discussions of the phenomenon of so called financialization the increasing impact of financial institutions on the activity of all business entities emerging threats related with dynamically developing financial markets and the growing importance of financial themes In light of these issues which appear in all economies and touch all entities and every area of economic activity there is a need for a summary and evaluation of the role of financialization in the world today This monograph presents the role of financialization in the modern world It shows positive as well as negative effects of financialization on the stability of the whole economy the functioning of different types of markets activity of enterprises state institutions and behaviours of households Written by expert contributors this book plays an important role in the debate concerning future directions of development of the financial sector and financial markets Financialization and the Economy is of great importance to those who study political economy macroeconomics and banking *The Politics of Equity Finance in Emerging Markets* Kathryn C. Lavelle, 2004-10-14 Emerging market stock issuance relative to GDP rose in the late twentieth century to levels that roughly matched that of advanced industrial markets Nonetheless the connection between owning shares of emerging market stock and the ability to influence the management of these firms remains fundamentally different from the analogous institutional connection that has evolved in industrial markets The reasons for the differences in emerging markets are both historical and political in nature That is local equity markets have had the objective of providing for some degree of local ownership and control of large economic entities since the late nineteenth century However local markets have operated under different global political structures since that time ranging from imperialism to world wars to sovereign developmental states to neo liberal states Shares issued under these different structures have been reconfigured over time resulting in a lack of convergence along either the Anglo American or Continental models of corporate governance The author uses a political science paradigm to explain the growth of emerging equity markets She departs from conventional economic explanations and examines politics at the micro level of large issues of emerging market stock The second half of the book presents case studies dealing with emerging market countries in Latin America Asia Russia and Eastern Europe Africa and the Middle East The case studies connect the regional state and firm levels to detail the multiple ownership and control arrangements and to dispel the notion that mere quantitative growth of these markets will lead to a convergence in financial institutional structures along the lines of the industrial core of the world economy **Monthly Catalog of United States Government Publications** ,1997 **The Encyclopedia of Associations and Information Sources for Architects, Designers, and Engineers** , **Transatlantic Policymaking in an Age of Austerity** Flor Aarts, 2004-11-11 Transatlantic Policymaking in an Age of Austerity integrates the study of politics and public policy across a broad spectrum of regulatory and social welfare policies in the United States and several nations of Western Europe The editors and a sterling list of contributors look at policymaking in the 1990s through the present providing a comparative politics framework stressing both parallel development and the differences between and among the nations Similar

prevailing ideas and political factors can be identified and transatlantic comparisons made providing for a clearer understanding of the policymaking process Faith in regulated markets and the burden of rising welfare costs are concerns found on both sides of the Atlantic Western democracies also share political climates colored by economic austerity low trust in government pressures from interest groups and a sharply divided electorate Because of differing political processes and differing policy starting points a variety of disparate policy decisions have resulted Real world policymaking in the areas of welfare health labor immigration reform disability rights consumer and environmental regulation administrative reforms and corporate governance are compared Ultimately the last decade is best characterized as one of drift sluggish changes with little real innovation and much default to the private sector In general policymakers on both sides of the ocean constrained by economic necessity have been unable to produce policy outcomes that satisfy the key segments of the electorate The contributors examine the United States Great Britain France and Germany as well as a number of other European countries and study the European Union itself as a policymaking institution Transatlantic Policymaking in an Age of Austerity distills the prominent issues politics and roles played by governmental institutions into a new understanding of the dynamics of policymaking in and among transatlantic nations The Indian Economy Since 1991: Economic Reforms and Performance, 2/e B. A. Prakash, 2011 The Indian Economy Since 1991 Economic Reforms and Performance is the outcome of a collaborative effort by 28 experts who have made significant contributions in research toward the Indian economy Using a data based analytical approach to key economic issues and problems coupled with extensive coverage and a critical and in depth analysis of the developments in all major sub sectors of the Indian economy this edited volume examines the impact of the reforms on various fronts such as economic performance employment unemployment planning process financial and fiscal sectors external sector agriculture industry infrastructure health education poverty and federal finance since 1991
