## **Security Protocols 9th International Workshop Cambridge Uk April 2527 2001 Proceedings:**

**Security Protocols** Bruce Christianson, Bruno Crispo, James A. Malcolm, Michael Roe, 2002-09-23 Hello and welcome  
These are the proceedings of the 9th International Workshop on Security Protocols the first to be held in the new millennium  
This year our theme was mobile computing versus immobile security As usual the insights and challenges which emerged  
during the workshop are reflected in the position papers which appear here in rewritten form Transcripts are also included of  
the discussions which took place in Cambridge as the initial versions were presented These transcripts are intended to provide  
a perspective on lines of argument which are worth pursuing further Our desire is that you will join with us in this activity  
and that as a result you will like many of our participants feel moved to propound something quite different from what you  
originally planned Our thanks as always to Prof Roger Needham FRS and to Microsoft Search Ltd Cambridge for the use of  
the meeting room and coffee machine Thanks also to Lori Klimasewska of the University of Cambridge Computing Service  
for transcribing the audio tapes and for revealing in Audrey James a previously unsuspected double life of a well known  
double agent and to Dr Mary Buchanan for her assistance in editing the transcripts into a Thucydidean mould Actually we are  
often asked how we go about producing the transcripts especially upon those occasions when for various reasons no audio  
recording was made This year we bow to pressure and reveal the details of our methodology in the Afterword *Security
