Maritime Security of India Dr. Suresh R, 2014-02-01 This book focuses on various aspects of maritime security of India Starting with the changing dimensions of national security it addresses the issues such as non traditional threats to security the threat posed by non state actors the causes of insecurity and also the imperatives of tackling the human security challenges The need for a comprehensive change in India s security policy is well exposed and certain policy prescriptions are also given The oceans are generally meant for better inaction among nations especially in the era of accelerated pace of globalization With regard to the coastal security of India the role of coastal community is significant The needs for inculcating awareness among the coastal community on coastal security matters as well as infrastructure development along the coastal area are also emphasized It is very important to look into the basic problems of coastal people as they face many human security challenges When we look into the coastal security a convergence of the national security concerns and human security concerns is visible The overall development of the coastal area would lead to better human security and better human security would result in enlisting the support of the coastal community to ensure national security programme especially the coastal security In short coastal security is not only about protecting the coastal terrain and territorial waters from direct attacks by the state actors or non state actors but also safeguarding the interests of all stake holders

Political Change, Democratic Transitions and Security in Southeast Asia Mely Caballero-Anthony, 2009-12-16 The fragility of democracy in Southeast Asia is a subject of increasing concern While there has been significant movement in the direction of democratisation the authoritarian tendencies of popularly elected leaders and the challenges posed by emerging security threats have given rise to a shared concern about the return of military rule in the region This book examines the nature of political transitions in Southeast Asia and why political

transitions towards political liberalisation and democracy have often failed to take off It considers political systems in Southeast Asia that have gone through significant periods of transition but continue to face serious challenges toward democratic consolidation Some key questions that the book focuses on are Are emerging democracies in the region threatened by weak failed or authoritarian leadership Are political institutions that are supposed to support political changes toward democratisation weak or strong How can democratic systems be made more resilient and What are the prospects of democracy becoming the defining political landscape in Southeast Asia *Handbook of Asian Security Studies* Sumit Ganguly, Andrew Scobell, Joseph Liow, 2009

Climate Change and Food Security in South Asia Rattan Lal, Mannava VK Sivakumar, S.M.A. Faiz, A.H.M. Mustafizur Rahman, Khandakar R. Islam, 2010-10-17 This book addresses an important topic of food security in South Asia with specific reference to climate change Of the 1 billion food insecure people in the world more than 30% are in South Asia The problem of food insecurity may be exacerbated by the projected climate change especially because of the water scarcity caused by rapid melting of the glaciers in the Himalayas and increase in variability in monsoonal rains and frequency of extreme events Furthermore large populations of Bangladesh and other coastal regions may be displaced by sea level rise Thus this volume addresses recommended land use and soil water crop vegetation management practices which would enable land managers to adapt to climate disruption by enhancing soil ecosystem social resilience In addition to biophysical factors this book also addresses the issues related to human dimensions including social ethnical and political considerations *An Introduction to Non-Traditional Security Studies* Mely Caballero-Anthony, 2015-11-30 With the end of the Cold War threats to national security have become increasingly non military in nature Issues such as climate change resource scarcity infectious diseases natural disasters irregular migration drug trafficking information security and transnational crime have come to the forefront This book provides a comprehensive introduction to Non Traditional Security concepts It does so by Covering contemporary security issues in depth Bringing together chapters written by experts in each area Guiding you towards additional material for your essays and exams through further reading lists Giving detailed explanations of key concepts Testing your understanding through end of chapter questions Edited by a leading figure in the field this is an authoritative guide to the key concepts that you ll encounter throughout your non traditional and environmental security studies courses

Climate Security in the Indo-Pacific Mely Caballero-Anthony,Alistair D.B. Cook,2025-08-14 This book explores the intersection of climate change and security in the Indo Pacific from the South China Sea disputes to national and regional security practices in India Japan and Southeast Asia highlighting the vulnerability of countries facing extreme weather sea level rise and geopolitical tensions The Indo Pacific is the world s most exposed region to natural hazards and climate change is highly likely to impact the frequency and severity of these events threatening people s lives and livelihoods Over the last two decades research into the security implications of climate change has gained considerable interest among scholars and policy analysts across the world Evidence based research has shown how the impact of climate change such as sea level rise long droughts and extreme weather events have led to loss of livelihoods economic downturns forced migration and health threats from emerging infectious diseases The effects of climate change in turn have led to greater potential for conflicts breaking out in societies most affected by climate change As countries in the region face both climate challenges and strategic competition their experiences offer valuable insights into how we can tackle this issue This book is essential reading for students scholars and policymakers engaged in the fields of climate change security studies and international relations The chapters in this book were originally published as a special issue of Third World Quarterly

Changing Security Dynamics in East Asia Elena Atanassova-Cornelis,Frans-Paul van der Putten,2016-04-30 This original and detailed collection explores how regional actors deal with uncertainties that are inherent to the current geopolitical situation in East Asia The contributors collectively demonstrate that strategic uncertainty has become a major factor in the shaping of the security order in East Asia

East and South-East Asia Andrew T. H. Tan,2013-07-03 The economic growth of East and South East Asia in the context of the global financial crisis has strengthened the view that this region is emerging in the 21st century as the most economically vibrant region in the world With some of the largest economies and generally high economic growth rates compared to the rest of the world it is unsurprising that East and South East Asia has become the subject of global interest East Asia s rise inevitably focuses attention on the issue of China s emergence as a regional and global power Such a prospect challenges the current status quo in which the region is dominated by the USA and its regional allies and issues in Sino US strategic relations have raised global awareness of the need to understand this pivotal region better In addition the Taiwan issue continues to evoke nationalist sentiments in China and North Korea continues to threaten regional stability Non traditional or alternative security issues are also of major importance in the region including natural disasters and epidemics as well as challenges relating to human rights and governance transnational crime demographic

issues economics and trade and regionalism This Handbook aims to offer an insight into these issues The volume is divided into two main sections The first International Relations and Security Perspectives will focus on the international relations of the region paying special attention to the key state players The chapter contributions will examine the security perspectives and foreign and defence policies of these states as well as key bilateral relationships The second section will examine key Regional Non traditional Security Issues including globalization transnational health challenges population growth and the environment

China, India, and East and Southeast Asia: Assessing Sustainability Ray C. Anderson, Sam Geall, Jingjing Liu, Sony Pellissery, E. N. Anderson, Joel R. Campbell, Joanna I. Lewis, Muhammad Aurang Zeb Mughal, Mark Wilson, 2012-11-01 China India and East and Southeast Asia Assessing Sustainability provides unprecedented analyses by regional experts and scholars elsewhere in the world on China India and their neighbors Despite growing demands internally on their natural resources China and India alone are home to more than one third of the world's population the expanding global economic influence of this region makes these countries vital players in a sustainable future for all citizens of the Earth Regional coverage includes topics such as business and commerce environmental and corporate law and lifestyles and values

Multi-Hazard Early Warning and Disaster Risks Dilanthi Amaratunga, Richard Haigh, Nuwan Dias, 2021-09-11 This book presents a collection of papers under the theme of multi hazard early warning and disaster risks These were selected from the presentations made at the International Symposium on Tsunami and Multi Hazard Risks Early Warning and Community Awareness in supporting implementation of the Sendai Framework for Disaster Risk Reduction 2015 2030 This conference aimed to recognize achievements and to highlight work that still needs to be carried out The conference promoted collaboration among academia research institutions and disaster management offices and further encouraged multidisciplinary and multi sectoral interaction This International Symposium on Multi Hazard Early Warning and Disaster Risk Reduction provided an important opportunity to reflect upon our progress to date in tackling disaster risk but also to consider some of the challenges and opportunities that lay ahead of us A particular focus of this event was Multi Hazard Early Warning During the negotiations for the Sendai Framework countries and partners highlighted the need to

- 1 Continue to invest in develop maintain and strengthen people centred end to end early warning systems
- 2 Promote the application of simple and low cost early warning equipment and facilities
- 3 Broaden the dissemination channels for early warning information to facilitate early action

Countries also called for the further development of and investment in effective nationally compatible regional multi hazard early warning mechanisms To address these needs global Target g of the Sendai Framework was adopted namely to substantially increase the availability of and access to multi hazard early warning systems and disaster risk information and assessments to the people by 2030 As illustrated by recent events in Indonesia it is also vital to address the challenge of cascading hazards that pose a tsunami risk and the importance of linking tsunami early warning to a multi hazard environment However moving towards a multi hazard environment is complex and poses many

challenges but can bring significant benefits in terms of efficiencies and also in recognising the links between hazards such as cascading threats. We very much hope that this book will provide an important platform to address these and other challenges in addressing disaster risk as well as supporting implementation of the Sendai Framework for Disaster Risk Reduction.

Human Security and Climate Change in Southeast Asia Lorraine M. Elliott, Mely Caballero Anthony, 2013. This book makes an important and timely contribution to debates about the relationship between climate change and security in Southeast Asia. It does so through a human security lens drawing on local and regional expertise to discuss the threats that climate change poses to human security in Southeast Asia and to show how a human security approach draws attention to the importance of adaptation and strategies for social resilience. In doing so it exposes the consequences of climate change the impact on community rights and access the special problem of border areas before going on to investigate local and regional strategies for addressing the human security challenges of climate change.

Enhancing Food Production System Resilience for Food Security Facing a Changing Environment Liming Ye, Ping Zhu, 2023-11-28. As the dominant source of the human food supply the global land system underlies the foundation of the livelihood and wellbeing of humanity on Earth. On the one hand the growth rate in the land system's productive capacity of food has played a key role in global food provision. Technological breakthroughs in wheat and rice production during the past few decades for instance have greatly contributed to the maintenance of this growth rate in many parts of the world. On the other hand however the terrestrial food production system is facing increasing challenges from environmental stressors ranging from climate change air pollution to land degradation. Whether and how the global land system will support the food security of more than 10 billion people in the 21st century while minimizing its environmental footprint remains an open question to debate. It is inevitable that the global food production system has to be shifted from focusing on production expansion to land system resilience so that the dual goals of sustainable production and environmental friendliness can be simultaneously achieved.

Maritime Security between China and Southeast Asia Liselotte Odgaard, 2017-03-02. Arguing that security relations between China and Southeast Asia are profoundly affected by disputes over maritime space and territory in the South China Sea the author demonstrates that the primacy of strategic competition over strategic partnerships promotes the emergence of a structure of deterrence encouraging South East Asia to side with the United States to balance the military power of China. Combining the concepts of international disputes and order the book establishes a framework designed to focus on periods of transition where international regulatory mechanisms are out of step with developments in the security environments of states. Features include Substantial evidence that strategic competition between the United States China and South East Asia promotes stability. A comprehensive account of military diplomatic economic historical and legal aspects of security environments of states. Suitable for scholars and graduate students of international relations international law security studies conflict management and regionalism it will also be invaluable supplementary reading for undergraduate courses.
