Maritime Security and the Law of the Sea Natalie Klein, 2012-10-04 Maritime Security and the Law of the Sea examines the rights and duties of states across a broad spectrum of maritime security threats It provides comprehensive coverage of the different dimensions of maritime security in order to assess how responses to maritime security concerns are and should be shaping the law of the sea The discussion sets out the rules regulating passage of military vessels and military activities at sea law enforcement activities across the different maritime zones information sharing and intelligence gathering as well as armed conflict and naval warfare In doing so this book not only addresses traditional security concerns for naval power but also examines responses to contemporary maritime security threats such as terrorism weapons of mass destruction piracy drug trafficking environmental damage and illegal fishing While the protection of sovereignty and national interests remain fundamental to maritime security and the law of the sea there is increasing acceptance of a common interest that exists among states when seeking to respond to a variety of modern maritime security threats This book argues that security interests should be given greater scope in our understanding of the law of the sea in light of the changing dynamics of exclusive and inclusive claims to ocean use More flexibility may be required in the interpretation and application of the UN Convention on the Law of the Sea if appropriate responses to ensure maritime security are to be allowed

Maritime Security and the Law of the Sea Natalie Klein, 2011-01-13 Maritime security is of increasing importance in a world threatened by terrorism piracy and drug trafficking This book sets out and evaluates the legal framework regulating the use of force on the oceans as well as challenges like illegal fishing and environmental damage It suggests that more flexible rules are needed to safeguard the seas

Legal Challenges in Maritime Security John Norton Moore, 2008-08-31 Maritime security is a major challenge for the international community that cuts across a broad spectrum of scholarly disciplines and maritime operation This volume provides in depth analysis of current international and regional approaches to maritime security cargo port and supply chain security maritime information sharing and capacity building The work describes measures in place at multilateral and regional levels to improve information sharing and operational coordination regarding security threats to shipping offshore installations and port facilities Several chapters address measures aimed at reducing acts of piracy and armed robbery against shipping at sea This edited volume contains articles by government officials senior naval and coast guard

commanders as well as by leading jurists and academics One unique feature of this volume is that many of the contributions are by operational commanders with first hand experience of the practical law enforcement problems involved in minimizing disruption to legitimate trade and business This collection will appeal to all concerned with maritime security and the protection of vital international trade by sea The CD accompanying the volume includes important documents such as the UN Convention on the Law of the Sea as well many PowerPoint presentations from the thirty first annual Virginia conference held in Heidelberg Germany May 24 26 2007 The Future of the Law of the Sea Gemma Andreone,2017-03-30 This book is open access under a CC BY NC 4 0 license It explores the diverse phenomena which are challenging the international law of the sea today using the unique perspective of a simultaneous analysis of the national individual and common interests at stake This perspective which all the contributors bear in mind when treating their own topic also constitutes a useful element in the effort to bring today s legal complexity and fragmentation to a homogenous vision of the sustainable use of the marine environment and of its resources and also of the international and national response to maritime crimes The volume analyzes the relevant legal frameworks and recent developments focusing on the competing interests which have influenced State jurisdiction and other regulatory processes An analysis of the competing interests and their developments allows us to identify actors and relevant legal and institutional contexts retracing how and when these elements have changed over time

Non-Traditional Security Issues and the South China Sea Shicun Wu,Keyuan Zou,2016-05-23 While there is abundant literature discussing non traditional security issues there is little mention of such issues existing in the South China Sea This area is vulnerable to natural hazards and marine environmental degradation The marine ecosystem is threatened by various adverse sources including land based pollution busy shipping lanes and over exploitation activities which threaten the security of the surrounding population This area is also threatened by piracy and maritime crimes but law enforcement becomes difficult due to unclear maritime boundaries This volume is designed to explore the security cooperation and regional approaches to these non traditional security issues in the hope to build a peaceful environment and maintain international and regional security and order in the South China Sea region **The Interception of Vessels on the High Seas** Efthymios Papastavridis,2014-08-28 The principal aim of this book is to address the international legal questions arising from the right of visit on the high seas in the twenty first century This right is considered the most significant exception to the fundamental principle of the freedom of the high seas the freedom in peacetime to remain free of interference by ships of another flag It is this freedom that has been challenged by a recent significant increase in interceptions to counter the threats of international terrorism and WMD proliferation or to suppress transnational organised crime at sea particularly the trafficking of narcotics and smuggling of migrants The author questions whether the principle of non interference has been so significantly curtailed as to have lost its relevance in the contemporary legal order of the oceans The book begins with an historical and theoretical examination of the framework underlying interception This historical survey informs the remainder

of the work which then looks at the legal framework of the right of visit contemporary challenges to the traditional right interference on the high seas for the maintenance of international peace and security interferences to maintain the bon usage of the oceans navigation and fishing piracy j ure gentium and current counter piracy operations off the coast of Somalia the problems posed by illegal unregulated and unreported fishing interdiction operations to counter drug and people trafficking and recent interception operations in the Mediterranean Sea organised by FRONTEX
