is that history has shown how certain species have persuasively coexisted with humans for so many millennia yet a conflict happens between animals and humans and within humans over animals It is thus logical to believe that the forces which create this conflict cannot solely be natural to the species in question and have to come from outside from the settlement patterns of both species and the net resultant force and dynamics The book looks at these dichotomies in four distinct but interrelated ways It delves deep inside four niches which form the dynamics of any settlement spatial cultural ecological and economic and explores all scales at which the succession and evolution of animals take place in highly urbanized settlements

answers but sad to say that our answers do not help us When God Created the World he put every thing in motion to sustain life and to heal our Sickness and Diseases We have however gone so far away from his teachings and we have now developed our own ways and rejected his way My advice is that we seek to find his way and obey his will Let us not forget the words of Jesus Christ who told us that God is our Father and as Father he has the responsibility for our well being
