Our Children May Live Sarah Augustine, Sheri Hostetler, 2023-10-31 Will we choose life for our children and the future of our planet Everywhere we look we see signs that all is not right with our earth Extreme weather patterns wreak havoc Pollutants sour soils and waterways Fires and floods ravage land and communities Climate change is just a symptom of a larger ecological crisis If we want change the solutions can't come through the same systems that created those problems Ecological justice requires us to challenge our assumptions about creation and our relationship to it It requires decolonization We must turn to the leadership of Indigenous communities who struggle for all life as land and water protectors and we must call on people of faith to join them to confront climate change and resource extraction and choose life for our children and the future of our planet This book offers hope for a better future alongside concrete actions for joining with Indigenous Peoples to protect life and negotiate with decision makers for sustainable change that follows Jesus

What You See Is What You Hear Dario Martinelli, 2020-01-01

What You See Is What You Hear develops a unique model of analysis that helps students and advanced scholars alike to look at audiovisual texts from a fresh perspective. Adopting an engaging writing style, the author draws an accessible picture of the field, offering several analytical tools, historical background, and numerous case studies. Divided into five main sections, the monograph covers problems of definitions, history, and most of all, analysis. The first part raises the main problems related to audiovisuality, including taxonomical and historical questions. The second part provides the bases for the understanding of audiovisual creative communication as a whole, introducing a novel theoretical model for its analysis. The next three parts focus on the model in all its constituents, and with plenty of case studies taken from the field of cinema, TV, music, videos, advertising, and other forms of audiovisuality. Methodologically, the book is informed by different paradigms of film and media studies: multimodality studies, structuralism, narratology, auteur theory, in the broad sense, communication studies, semiotics, and the so-called Humanities. *What You See Is What You Hear* enables readers to better understand how to analyze the structure and content of diverse audiovisual texts, to discuss their different idioms, and to approach them with curiosity and critical spirit.
