The Crisis in Sociology Joseph Lopreato, Timothy Alan Crippen, 2001-09-01 Crisis in Sociology presents a compelling portrait of sociology's current troubles and proposes a remedy that is likely to inspire controversy In the authors view sociology's crisis has deep roots traceable to the over ambitious sweep of the discipline's founders Lopreato and Crippen argue that the most disabling flaw is the failure to discover even a single general law or principle necessary to systematically organize empirical observations guide inquiry by suggesting falsifiable hypotheses and form the core of a genuinely cumulative body of knowledge Crisis in Sociology invites sociologists to consider that participation in the new social science exemplified by thriving new fields such as evolutionary psychology may help to build a vigorous scientific sociology *Social Life and Moral Judgment* Antony Flew, 2017-12-02 In Social Life and Moral Judgment author and philosopher Antony Flew examines the social problems induced by the mature welfare state Welfare states make ever increasing financial demands on their citizenry yet the evidence clearly supports that such demands are not sustainable In this superlative collection of thematic essays Flew investigates and explains why this is so and calls for a return to individual responsibility The first essay establishes the philosophical basis for his argument Is Human Sociobiology Possible answers its titular question in the negative asserting that we are all members of a peculiar type of creature that can and therefore must be responsible for whatever choices between various courses of action or inaction that are open to us as individuals In other essays Flew shows how state welfare systems inevitably corrupt and demoralize their citizens by encouraging ever more people to apply for

welfare entitlements and reducing the incentives to avoid or escape the conditions warranting those entitlements He investigates the origins of this new kind of welfare entitlement and shows how very different what politicians and public sector employees produce is from what these people claim to be producing Flew shows that the drive for social justice appears to require that the justly acquired income and wealth of all citizens should be progressively taxed away or supplemented by the state so that the eventual result is more though never perfect equality This objective he asserts must be radically distinguished from old fashioned without prefix or suffix justice It was this type of justice Adam Smith referred to when he famously said that it is a virtue of which the observance is not left to the freedom of our wills but which may be extorted by force Flew question the aims of those who would discredit wealth creators and wealth creating investment showing that these are the same people who prom **Cradle To Grave** Ralph Segalman,David Marsland,1989-04-21

Risky Business? Robert MacDonald, Frank Coffield, 2015-04-22 First published in 1991 MacDonald and Coffield look at the implementation and outcome of enterprise initiatives introduced in Teeside in relation to 100 unemployed young adults in the age range 16 25 within a political ideology which has sought to change a dependency culture to one of self reliance The young people studied are categorized with reference to their attitude to and experience of work and a number of case studies are cited An important aspect of the study is that it is specifically concerned with ordinary young people The conclusions are worked out in terms of the changing culture of work government policies the internationalization of labour markets and the changing fortunes of young adults in Britain in the 1990s **Sociology in Action** Malcolm Cross, Geoff Payne, 1993-10-22 In the last decade of this century sociology has grown into a major contributor to public debate and social policy After a period of introspection and uncertainty sociologists are becoming more self confident about their subject s potential to influence events in the world at large Here a collection of well known sociologists debate what this means for the way sociology is professionally practised in areas as diverse as regulating medicine combating racism managing manufacturing evaluating wealth and poverty and structuring education The issues and opportunities they identify will interest both sociologists and other social scientists concerned with moving ideas into a framework for social action Deciphering the Enterprise Culture (Routledge Revivals) Roger Burrows, 2015-07-24 The idea of the enterprise culture has been much vaunted over the last few decades the growth of self employment and small business ownership has been an important feature of the restructuring of the British economy Because it is a concept that is difficult to evaluate controversial and politically sensitive social scientists were slow to analyse it Consequently it had been caricatured and many questions about its impact on society and the economy had been left unanswered This collection which was first published in 1991 presents a critical analysis of the various manifestations of the enterprise culture Drawing upon a range of research it deals with a number of related topics The result is a powerful analysis of the material and ideological role of the petty bourgeoisie in contemporary capitalism Its multidisciplinary approach which contributions from leading scholars in the field makes this book of interest to anyone

wanting to make sense of the socio economic restructuring of Britain Culture and Civilization Irving Horowitz, 2018-02-06 Intellectual activity in the twentieth century took place largely under the banner of science and society As the new millennium develops it is becoming evident that science and society are not words that represent an unmitigated good nor for that matter do they exhaust what is new in the human condition Past writing on the theme of culture has emphasized the growth and expansion of human capabilities Recent use of the term civilization has placed great emphasis on the fall from grace of human beings The use of both terms is rapidly changing Culture and Civilization develops critical ideas intended to produce a positive intellectual climate one that is prepared to confront threats and alert us to the opportunities of the twenty first century It recognizes that the twenty first century presents people in all fields and of all faiths with shared challenges Culture and Civilization embraces the work of novelists journalists cultural figures technologists physical sciences historians and policy personnel who range beyond social science areas What they have in common is a view that civilization is under assault and that it represents a cause worth advancing and defending This publication does not embrace idiosyncratic visions of the clash of world civilizations or the end of Western civilization It does attempt to bring together immediate issues of the century that are substantially new and challenging We see that the essential polarity between democracy and autocracy has now taken on larger deeper dimensions in a different political economic and ecological terrain the central issue of our day is now civilization versus barbarism The character of democratic culture is central to the global equation and the systemic challenge This publication is a sober response to such a challenge **Nationalism** John Hutchinson, Anthony D. Smith, 2000 A comprehensive collection of articles on the subject of nationalism It covers concepts and definitions forms of nationalism worldwide and nationalism and culture and feminism and politics **Social Policy Review 16** Nick Ellison, Linda Bauld, Martin Powell, 2004-07-14 Social Policy Review 16 is an excellent source of information and opinion about core aspects of contemporary social policy for students and academics alike It will also appeal to all those with an interest in welfare in the widest sense of the term **Paths of Enterprise** James Curran, Robert A. Blackburn, 2005-08-04 While small scale enterprise has expanded rapidly in recent years the way ahead looks uncertain Drawing together recent research and thinking on small business activities from several disciplines this book gives a comprehensive picture of the current situation and assesses the future It evaluates the impact of such diverse influences as technological innovation demographic change changes in orgn environment women and entrepreneurship and by analysing trends in employment levels banking policies and government schemes it explores ways to survive in an increasingly hostile environment **International Journal of Advertising** , 1988 **Consumption and Class** Roger Burrows, Catherine Marsh, 2016-07-27 An edited collection exploring divisions and changes within and between the spheres of consumption and production Topics include the relationship between consumption and production the social construction of consumers housing and social class mobility health provision the role of the service class and access to higher education Peter Saunders work provides the initial stimulus for many of the

papers but all go beyond his narrow conception of a sociology of consumption and his liberal analysis of patterns of social inequality
