Seeing by Wireless Ray Herbert,1997 **Seeing by Wireless** Kirby L. McKinney,1998 **The Birth of British Television** Mark Aldridge,2017-09-16 When the BBC launched the world's first regular high definition television service on 2 November 1936 it was the culmination of decades of technological innovations More than this however the service meant that the principle of television had finally found its place The Birth of British Television A History traces the early history and development of television from the experiments of amateurs to the institutionalised developments that led to the world's first regular high definition television service Author Mark Aldridge provides a clear in depth and accessible introduction for those either exploring the period for the first time or seeking new insights into the beginnings of the industry In tracing the origins and development of television Aldridge focuses on a number of important factors including the attitude of the press towards early television and examines the way that expectations of television changed over time prior to its official launch Utilising new research this illuminating study examines how the aims for a new television service developed and the extent to which content and technology were linked The Birth of British Television approaches this formative period from several perspectives from private individuals to the BBC and government while also examining the broader opinions at the time towards the new medium through press reports and feedback from the general public Also included is an assessment of early programming which helps to offer a new and profound evaluation of the development of early television Mark Aldridge is a Lecturer in Film and TV Studies at Southampton Solent University UK He specialises in British television and both film and television history His previous publications include T is for Television 2008 an analysis of the work of Russell T Davies co written with Andy Murray **Restoring Baird's Image** Donald F. McLean,2000 Baird a British television pioneer experimented with video recording on gramophone discs in the late 1920s McLean a consultant has restored the surviving Phonovision discs and using computer techniques reminiscent of an archaeological dig has revealed the images on the discs and uncovered details of how the recordings were made McLean also restored amateur recordings of the BBC's 30 line Television Services 1932-1935 providing a glimpse at what viewers were then watching This book helps explain this period in television history Illustrated with historic photographs it sheds light on the achievements of Baird the development of video recording and the definition and invention of television itself c Book News Inc **AND THE WORLD LISTENED: The Story of Captain Leonard Frank Plugge and the International Broadcasting Company.** Keith Wallis,2008 **Seeing by Electricity** Doron Galili,2020-02-28 Already in the late nineteenth century electricians physicists and telegraph technicians dreamed of inventing televisual communication apparatuses that would see by electricity as a means of extending human perception In Seeing by Electricity Doron Galili traces the early history of television from fantastical image transmission devices initially imagined in the 1870s such as the Telectroscope the Phantoscope and the Distant Seer to the emergence of broadcast television in the 1930s Galili examines how televisual technologies were understood in relation to

film at different cultural moments whether as a perfection of cinema a threat to the Hollywood industry or an alternative medium for avant garde experimentation Highlighting points of overlap and divergence in the histories of television and cinema Galili demonstrates that the intermedial relationship between the two media did not start with their economic and institutional rivalry of the late 1940s but rather goes back to their very origins In so doing he brings film studies and television studies together in ways that advance contemporary debates in media theory

A Post-Nationalist History of Television in Ireland Edward Brennan, 2019-01-25 This book explores the question of how society has changed with the introduction of private screens Taking the history of television in Ireland as a case study due to its position at the intersection of British and American media influences this work argues that internationally the transnational nature of television has been obscured by a reliance on institutional historical sources This has in turn muted the diversity of audience experiences in terms of class gender and geography By shifting the focus away from the default national lens and instead turning to audience memories as a key source *A Post Nationalist History of Television in Ireland* defies the notion of a homogenous national television experience and embraces the diverse and transnational nature of watching television Turning to people's memories of past media this study ultimately suggests that the arrival of the television in Ireland and elsewhere was part of a long term incremental change where the domestic and the intimate became increasingly fused with the global

A History Of Early Television Vol 1 Stephen Herbert, 2024-02-29 In the 21st Century broadcast television is an established part of the lives of many millions of people all over the world bringing information and entertainment directly into our homes The pieces in this volume date from 1879 to 1934 and consist of a selection of books articles and news items relating to the first developmental period of television before it became the ubiquitous medium that we know today The selection is English language material only

H. G. Wells, Modernity and the Movies Keith Williams, 2007-12-01 This book investigates Wells's interest in cinema and related media technologies by placing it back into the contemporary cultural and scientific contexts giving rise to them It plugs a gap in understanding Wells's contribution to exploring and advancing the possibilities of cinematic narrative and its social and ideological impacts in the modern period Previous studies concentrate on adaptations this book accounts for the specifically proto cinematic techniques and concerns of Wells's texts It also focuses on contemporary film making in dialogue with his ideas Alongside Hollywood's later transactions it gives equal weight to neglected British and continental European dimensions Chapter 1 shows how early writings *The Time Machine* and short stories feature many kinds of radically defamiliarised vision These constitute imaginative speculations about the forms and potentials of moving image and electronic media Chapter 2 discusses the power of voyeurism absent presence and the disjunction of sound image reproduction implied in *The Invisible Man* and its topical politics updated in notable screen versions Chapter 3 extends this to dystopian warnings of systematic surveillance broadcasting of celebrity personae and post literate video culture in *When the Sleeper Wakes* a crucial template for urban futures on film Chapter 4 analyses Wells's

belated return to screenwriting in the 1930s It accounts for his broadbrow ambition of mediating between popular and avant garde tendencies to promote his cause and its mixed results in *Things to Come* *The Man Who Could Work Miracles* etc Chapter 5 finally surveys Wells's legacy on both small and large screens It considers whether as well as being raided for scenarios for spectacular effects his subtexts still nourish an evolving tradition of alternative SF which duly critiques the innovations and applications of its host media

A History of Early Television Stephen Herbert, 2004 In the 21st Century broadcast television is an established part of the lives of many millions of people all over the world bringing information and entertainment directly into our homes The pieces in this volume date from 1879 to 1934 and consist of a selection of books articles and news items relating to the first developmental period of television before it became the ubiquitous medium that we know today The selection is English language material only

Gender and Early Television Sarah Arnold, 2021-05-20 Between the nineteenth century and the mid twentieth century television transformed from an idea to an institution In *Gender and Early Television* Sarah Arnold traces women's relationship to the new medium of television across this period in the UK and USA She argues that women played a crucial role in its development both as producers and as audiences long before the golden age of television in the 1950s Beginning with the emergence of media entertainment in the mid nineteenth century and culminating in the rise of the post war television industries Arnold claims that all along the way women had a stake in television As keen consumers of media women also helped promote television to the public by performing as television girls Women worked as directors producers technical crew and announcers It seemed that television was open to women However as Arnold shows the increasing professionalisation of television resulted in the segregation of roles Production became the sphere of men and consumption the sphere of women While this binary has largely informed women's role in television through her analysis Arnold argues that it has not always been the case
