Seeing Through The Veil:

Seeing Through the Veil Suzanne Conklin Akbari, 2004-01-01 During the later Middle Ages new optical theories were introduced that located the power of sight not in the seeing subject but in the passive object of vision This shift had a powerful impact not only on medieval science but also on theories of knowledge and this changing relationship of vision and knowledge was a crucial element in late medieval religious devotion In *Seeing through the Veil* Suzanne Conklin Akbari examines several late medieval allegories in the context of contemporary paradigm shifts in scientific and philosophical theories of vision After a survey on the genre of allegory and an overview of medieval optical theories Akbari delves into more detailed studies of several medieval literary works including the *Roman de la Rose* Dante's *Vita Nuova* *Convivio* and *Commedia* and Chaucer's dream visions and *Canterbury Tales* The final chapter *Division and Darkness* centres on the legacy of allegory in the fifteenth century Offering a new interdisciplinary synthetic approach to late medieval intellectual history and to major works within the medieval literary canon *Seeing through the Veil* will be an essential resource to the study of medieval literature and culture as well as philosophy history of art and history of science Seeing Through Race W. J. T. Mitchell, 2012-05-29 According to Mitchell a color blind post racial world is neither achievable nor desirable Against claims that race is an outmoded construct he contends that race is not simply something to be seen but is a fundamental medium through which we experience human otherness Race also makes racism visible and is thus our best weapon against it

Looking Through Images Emmanuel Alloa, 2021-10-05 Images have always stirred ambivalent reactions Yet whether eliciting fascinated gazes or iconoclastic repulsion from their beholders they have hardly ever been seen as true sources of knowledge They were long viewed as mere appearances placeholders for the things

themselves or deceptive illusions Today the traditional critique of the spectacle has given way to an unconditional embrace of the visual However we still lack a persuasive theoretical account of how images work Emmanuel Alloa retraces the history of Western attitudes toward the visual to propose a major rethinking of images as irreplaceable agents of our everyday engagement with the world He examines how ideas of images and their powers have been constructed in Western humanities art theory and philosophy developing a novel genealogy of both visual studies and the concept of the medium Alloa reconstructs the earliest Western media theory Aristotle s concept of the diaphanous milieu of vision and the significance of its subsequent erasure in the history of science Ultimately he argues for a historically informed phenomenology of images and visual media that explains why images are not simply referential depictions windows onto the world Instead images constantly reactivate the power of appearing As media of visualization they allow things to appear that could not be visible except in and through these very material devices
