Seeing Yellowstone In 1871:

Seeing Yellowstone in 1871 Marlene Merrill, 2005-01-01 In 1871 the young mineralogist Albert Peale set out with the vaunted Hayden Expedition to map and explore the Yellowstone Basin Ferdinand Hayden asked Peale his former student to write a series of letters to the Philadelphia Press about the survey's work Just as these letters the first impressions of Yellowstone sent back from the field introduced nineteenth century readers to some of the most breathtaking wonders of the American West they allow readers today to rediscover one of the nation's most beloved and visited natural areas as it was just five months before it became the world's first national park Written by a scientist for the general reader Peale's letters convey the grandeur of Yellowstone with great clarity and immediacy even as they offer apt detailed descriptions of the basin's geologic features from the geysers Giant Grotto and Mud among others to the creeks and rivers craters and springs Illustrating these descriptions are the earliest artistic images of Yellowstone also done during the expedition watercolor field sketches by Thomas Moran photographs by William Henry Jackson and the now little known works of the party's official artist Henry Wood Elliott Ranging from dramatic panoramic landscapes to lighthearted sketches of the expedition's more personal moments these images combine with Peale's written impressions to give readers a true and rare sense of what it was like for these men to marvel at Yellowstone for the first time

Cartographic Expeditions and Visual Culture in the

Nineteenth-Century Americas Ernesto Capello, Julia B. Rosenbaum, 2020-11-16 During the nineteenth century gridding graphing and surveying proliferated as never before as nations and empires expanded into hitherto unknown territories Though nominally geared toward justifying territorial claims and collecting scientific data expeditions also produced vast troves of visual and artistic material This book considers the explosion of expeditionary mapping and its links to visual culture across the Americas arguing that acts of measurement are also aesthetic acts Such visual interventions intersect with new technologies with sociopolitical power and conflict and with shifting public tastes and consumption practices Several key questions shape this examination What kinds of nineteenth century visual practices and technologies of seeing do these materials engage How does scientific knowledge get translated into the visual and disseminated to the public What are the commonalities and distinctions in mapping strategies between North and South America How does the constitution of expeditionary lines reorder space and the natural landscape itself The volume represents the first transnational and hemispheric analysis of nineteenth century cartographic aesthetics and features the multi disciplinary perspective of historians geographers and art historians

Wonderlandscape John Clayton, 2017-08-08 Yellowstone is America's premier national park Today is often a byword for conservation natural beauty and a way for everyone to enjoy the great outdoors But it was not always this way Wonderlandscape presents a new perspective on Yellowstone the emotions various natural wonders and attractions evoke and how this explains the park's relationship to America as a whole Whether it is artists or naturalists entrepreneurs or pop culture icons each character in the story of Yellowstone ends up reflecting and redefining

the park for the values of its era For example when Ernest Thompson Seton wanted to observe bears in 1897 his adventures highlighted the way the park transformed from a set of geological oddities to a wildlife sanctuary reflecting a nation was concerned about disappearing populations of bison and other species Subsequent eras added Rooseveltian masculinity ecosystem science and artistic inspiration as core Yellowstone hallmarks As the National Park system enters its second century Wonderlandscape allows us to reflect on the values and heritage that Yellowstone alone has come to represent how it will shape the America s relationship with her land for generations to come *Descriptive Catalogue of the Photographs of the United States Geological Survey of the Territories for the Years 1869 to 1875, Inclusive* William Henry Jackson,1875

Sight Unseen argues that Fr mont used both a radical form of art and an imaginary map to create an aesthetic desire for expansion He not only redefined the Great Desert as a novel and complex environment but on a summit of the Wind River Range he envisioned the Continental Divide as a feature that would unify rather than impede a larger nation In addition to provoking the great migration to Oregon and providing an aesthetic justification for the National Park system Fr mont s report profoundly altered American views of geography progress and the need for a transcontinental railroad By helping to shape the very notion of Manifest Destiny the report became one of the most important documents in the history of American landscape
