The Evolving Structure of South Africa's Economy Seeraj Mohamed, Amuzweni Ngoma, 2024-01-23 South Africa still faces low economic growth and high unemployment coupled with the persistent challenges of poverty and inequality These exert pressure on South Africa to foster structural transformation that will facilitate a more inclusive and resilient economy Authors apply multiple theoretical and empirical perspectives to take stock of the historical and contemporary structure of the South African economy its evolving nature and possible future pathways The explore how South Africa s structural transformation agenda is affected by the global context and discuss debates on the extreme social impacts of globalised and financialised economic structures Contributors offer technical and analytical discussions of the overlapping structural faultlines that produce uneven economic performance They explain the changes and continuities of South Africa s economic structure bound by an analytical thread that centres power relations and political settlements Varied chapters explain how

poor governance and corruption have slowed down structural reform. This has been further exacerbated by the inconsistent availability of energy and the deterioration of logistics. The book details the structural reforms and policy regimes necessary for increasing productive capacity in South Africa's agriculture, manufacturing, agro-processing, retail and services, energy and mining industries. It also reflects on the role that micro and informal enterprises can play if afforded the necessary support. The technical details and analyses in the book highlight the need for a radical review of macroeconomic policy to reduce the country's chronic vulnerability to poverty and inequality.

Setbacks and Advances in the Modern Latin American Economy Pablo A. Baisotti, 2021-12-30. This volume explores several notable themes related to the economy in Latin America and offers insightful historical perspectives to understand national, regional and global issues in the continent since the beginning of the 20th century to the present day. The collected essays focus on economic crises, the relationship of growth models to society and politics, the fluctuations of local economies and regional protests. Other aspects of consideration in this area include the evolution of integrated regional trading blocs, the informal economy and the destruction of the productive potential that has had a serious social, cultural and environmental impact. The volume refuses to impose a traditional and uncritical linear historical narrative onto the reader and instead proposes an alternative interpretation of the past and its relation to the present.

Regional Financial Cooperation Jose Antonio Ocampo, 2007-08-29. A Brookings Institution Press and Economic Commission for Latin America and the Caribbean (ECLAC) publication. Using the experience of postwar Western Europe as a benchmark, Jose Antonio Ocampo and his colleagues assess how regional financial institutions can help developing countries, often at a disadvantage within the global financial framework, finance their investment needs, counteract the volatility of private capital flows and make their voices heard. The 1997 Asian financial crisis generated extensive debate on the international financial architecture. Through this discussion, it became clear that services by financial institutions, including adequate mechanisms for preventing and managing financial crises and instruments for safeguarding global macroeconomic and financial stability, are undersupplied. Furthermore, private international capital markets provide finance to developing countries in a way that effectively reduces the ability of those nations to undertake countercyclical macroeconomic policies. International capital markets ration out many developing countries, particularly the poorest, from private global capital markets. While these deficiencies in the financial architecture are clear, the post-1997 debate has done little to evaluate the role that regional institutions could play in improving global financial arrangements. Regional Financial Cooperation aims to fill that important gap. Manimala, Kishinchand Poornima Wasdani, 2015-02-09 Economic development is a priority for all nation states whether developing or developed. In recent times a few among the developing nations often referred to as the emerging economies have attracted the world's attention because of their fast pace of economic growth. While the similarities among these nations for example the BRICS in the pattern of their economic growth are highlighted and discussed the differences are often glossed over. This book therefore attempts to present the diverse ways in which entrepreneurship is facilitated in emerging economies through a compilation of research papers from six different countries: India, China, Singapore, Hong Kong, Nigeria and New Zealand belonging to the class of emerging economies. The papers included in this book cover a variety of topics related to the creation and management of an entrepreneurial ecosystem such as intercultural interactions, IPR issues, government policies for SMEs, social entrepreneurship, opportunity identification, green entrepreneurship, employee entrepreneurship, symbiotic ventures and social capital, social fluidity, mapping for reducing failure stigma, green awareness in the corporate world and among entrepreneurs, venture capital for growth, immigrant entrepreneurs, entrepreneurial success and life satisfaction among others. The contributions are supported by an introductory chapter that provides an integrative framework by unifying the diverse patterns of economic development in the different countries under various institutional inadequacies as a process of muddling through to development necessitated by the non-systematic development of the ecosystem for new venture creation. This book is indeed a must read for those interested in understanding the process of entrepreneurship and economic development in emerging economies.

Government-Linked Companies and Sustainable, Equitable Development Terence Gomez, François Bafoul, Kee-Cheok Cheong, 2014-11-27 The debate over how far governments should intervene in economies in order to promote economic growth, a debate which from the 1980s seemed settled in favour of the neo-liberal non-interventionist consensus, has taken on new vigour since the financial crisis of 2008 and after. Some countries, most of them in industrialised Asia, have survived the crisis and secured equitable economic growth by adopting a developmental state model whereby governments have intervened in their economies often through explicit support for individual companies. This book explores debates about government intervention, assesses interventionist policies including industrial and innovation policies and examines in particular the key institutions which play a crucial role in implementing government policies and in building the bridge between the state and the private sector. The countries covered include China, India, South Korea, Malaysia and Taiwan together with representative countries from Europe and Latin America.

Contemporary Latin America Francisco Panizza, 2013-04-04 Latin America has changed dramatically over the past few years. While the 1990s were dominated by the politically orthodoxy of the Washington Consensus and the political uniformity of centre-right governments, the first decade of the new century is being characterised by the emergence of a plurality of economic and political alternatives. In an overview of the history of the region over the past twenty-five years, this book traces the intellectual and political origins of the Washington Consensus, assesses its impact on democracy and economic

economy in 2010 and 2011. In particular, the strong and fast responses of Brazil, China, and India helped mitigate deflationary risks and avoid a repetition of the Great Depression of the early 1930s. On the other hand, reforms of financial regulation and supervision are taking time to advance and little progress has been achieved so far in implementing measures to reduce global imbalances and to avoid a malfunctioning of the international exchange rate system. These would contribute to greater coherence between the international trading and financial systems and to creating a more stable international economic environment for development. This is a collection of papers that contribute to the debate on these topics, putting the South at centre stage. It examines how the countries of the South were affected by the global economic and financial crisis and how they responded to it.

The IMF and Global Financial Crises Joseph P. Joyce, 2013. Joyce traces the IMF's actions to promote international financial stability from the Bretton Woods era through the recent recession.
