Knight, Volume 2 Frank H. Knight, 1999 Frank H Knight 1885 1972 was a central figure many say the dominant influence in the development of the Chicago School of Economics at the University of Chicago in the 1930s and 1940s where he taught future Nobel laureates Milton Friedman James Buchanan George Stigler and many other notable scholars It was Knight's embedded skepticism about the reach of economic knowledge that set the stage for the laissez faire economics that matured at the University in the 1950s and 1960s But as important as Knight's technical economic

contributions were he never strayed far from his broad philosophical interests and concern for the state of modern liberal democracy Ross B Emmett s selection of Knight s essays is the first to offer a comprehensive picture of the work of this notable social scientist over the span of his career Included are not only Knight s most influential writings but also a number of uncollected papers which have not previously been widely accessible These essays illustrate Knight s views on the central debates regarding economics social science ethics education and modern liberalism Volume 1 What is Truth in Economics contains fifteen of Knight s papers up through 1940 Volume 2 Laissez Faire Pro and Con includes fourteen of Knight s papers from 1940 through 1967 including Socialism The Nature of the Problem and The Sickness of Liberal Society These twenty nine essays together stand not only as a monument to one of economics most significant and original thinkers but will also serve as an invaluable resource for economists philosophers and political scientists interested in the development of the western liberal tradition

The Polish Transformation Grzegorz Konat,2024-03-18 The book takes an in depth look at a hitherto unexplored part of the oeuvre of prominent Polish economist and historian of economic thought Tadeusz Kowalik his thesis that the systemic transformation that took place in Poland in the late 1980s was a de facto epigonic bourgeois revolution Since Kowalik actually never extended his argument to support this thesis the aim of the book is to answer the following question If some important reflections on the revolutionary character of the Polish transformation scattered throughout Kowalik s works were to be found would they together constitute a convincing justification for the thesis of the epigonic bourgeois revolution

Politics of Time Leszek Koczanowicz,2008-08-01 What has really happened in Poland since the election of 2005 After such spectacular events as the practice of lustration and the questioning of solidarity with the European Union one has to ask what is the nature of this newly emerging society As with many of the recent developments in former communist countries that seem to be mysterious and irrational the situation and ensuing problems are complex and the answers neither trivial nor easy This book by the distinguished Polish philosopher addresses these complexities through the role of the communist past in post communist Poland It describes the events that led to the collapse of the Solidarity program and the growing influence of the nationalistic and religious parties in the government The author investigates the nature of social and political temporality and develops a theoretical framework that allows him to apply his conclusions not only to Poland but also to other formerly communist countries

Rethinking Marxist Approaches to Transition Onur Acaroglu,2020-09-25 In Rethinking Marxist Theories of Transition Onur Acaroglu traces the concept of transition across the tracts of Classical and Western Marxism Rarely directly invoked transition between different societies appears as an

imminent social reality and a useful conceptual tool for critical social theory Transitions as qualitative shifts between societies are often considered as eventual historical stages or effaced altogether Theorising transition in a new direction Onur Acaroglu elaborates a theory of temporal dislocation Considering transition through a framework of out of joint temporalities the notion comes through as an undervalued tendency in social reproduction [A Marxist Mosaic](#) Jairus Banaji, 2024-07-01 Historical materialism as Marx understood this was always an integrated conception or field of research not one divided into separate disciplines The essays gathered in this volume are a remarkable example of how this works across a wide range of subjects as diverse as agrarian history capitalism Hegel's influence on Marx and class struggles in India They were written over some fifty years of both activism and academic work embodying Banaji's lifelong engagement with Marxist theory His recent papers on merchant capitalism can also be found here along with a biographical sketch that sets all of his work in context
