Service-Learning Pedagogy Virginia M. Jagla, Andrew Furco, Jean R. Strait, 2015-02-01 Service learning is a powerful method of teaching and learning that has been used effectively for more than two decades Its efficacy has been researched in a variety of ways and this volume continues to expand that research base In particular in this volume *Service Learning Pedagogy How Does It Measure Up* we explore three broad areas of service learning research and practice that reflect broader discussions of the role of pedagogy in today's educational reform efforts *Teacher Education Crossing Boundaries Deepening Relationships in Service Learning and New Paradigms Conceptual Frameworks* Many have called for more rigorous methods when researching service learning pedagogy That has been the major impetus for this volume We seek to generate knowledge regarding service learning pedagogy while developing theories about it We surface some elusive affective characteristics of the pedagogy which we know has the power to produce transformational learning To this end the authors who have contributed to this volume effectively add to the growing body of knowledge in the field and help us get closer to understanding the extent to which service learning does and does not measure up

Liberating Service Learning and the Rest of Higher Education Civic Engagement Randy Stoecker, 2016-05-23 This book questions the prioritization and theoretical philosophical underpinnings of the core concepts of service learning 1 learning 2 service 3 community and 4 change By liberating service learning the author suggests reversing the prioritization of the concepts

starting with change then community then service and then learning In doing so the author clarifies the benefits and purpose of this work arguing that it will create greater pedagogical and community impact This book challenges and hopefully will change our thinking about higher education community engagement **International Service Learning** Robert G. Bringle, Julie A. Hatcher, Steven G. Jones, 2023-07-03 International Service Learning ISL borrows from the domains of service learning study abroad and international education to create a new pedagogy that adds new and unique value from this combination It is a high impact pedagogy with the potential to improve students academic attainment contribute to their personal growth and develop global civic outcomes The international service experience provides opportunities for additional learning goals activities and relationships that are not available in a domestic service learning course or in a traditional study abroad course The service experience develops reflection while shedding light on and providing an added dimension to the curricular component of the study abroad course The international education component further broadens students perspectives by providing opportunities to compare and contrast North American and international perspectives on course content This book focuses on conducting research on ISL which includes developing and evaluating hypotheses about ISL outcomes and measuring its impact on students faculty and communities The book argues that rigorous research is essential to improving the quality of ISL s implementation and delivery and providing the evidence that will lead to wider support and adoption by the academy funders and partners It is intended for both practitioners and scholars providing guidance and commentary on good practice The volume provides a pioneering analysis of and understanding of why and under what conditions ISL is an effective pedagogy Individual chapters discuss conceptual frameworks research design issues and measurement strategies related to student learning outcomes the importance of ISL course and program design the need for faculty development activities to familiarize faculty with the component pedagogical strategies the need for resources and collaboration across campus units to develop institutional capacity for ISL and the role that community constituencies should assume as co creators of the curriculum co educators in the delivery of the curriculum and co investigators in the evaluation of and study of ISL The contributors demonstrate sensitivity to ethical implications of ISL to issues of power and privilege to the integrity of partnerships to reflection reciprocity and community benefits Advancing Knowledge in Service-Learning Shelley H. Billig, Georgia Davidson, Karen McKnight Casey, Nicole C. Springer, 2006-10-01 The purpose of this series of books is to advance the knowledge in the service learning research field More importantly this research is to be used to transform the field This transformation will come from realizing both the history of service learning and trying to imagine what the future may look like The chapters in this book all demonstrate just how far service learning research has come Researchers practitioners and students alike have benefited from its dissemination and use the research to improve practice The research does not simply inform educators how to create a better pedagogy Rather it informs a service learning practice that can transform both individuals and institutions **Improving Service-Learning Practice** Susan Root, Jane Callahan, Shelley H.

Billig, 2005-11-01 This fifth book in the Advances in Service Learning Research series continues to expand the discussion of service learning research and practice. The chapters were selected through a refereed blind review process from papers presented at the 4th Annual International K-12 Service Learning Research Conference held October 2004 in Greenville, South Carolina. The chapters focus on topics that address a variety of issues in higher education and teacher education and are organized into four sections.
