Services Trade Liberalisation and Facilitation Sherry Stephenson, Soonhwa Yi, 2002 Written for service sector policy makers this book describes the key issues related to the World Trade Organization's current round of service negotiations. Regional Economic Integration and Dispute Settlement in East Asia Anna G. Tevini, 2018-06-28 The accession of the People's Republic of China to the World Trade Organization (WTO) in 2001 significantly transformed the global economy both de facto and de jure. At the regional level, China's WTO accession served as an important catalyst for the establishment of Regional Trade Agreements (RTAs) in East Asia. This was a novel development for the region since East Asian States had previously followed a largely informal market driven approach to regional economic integration. By contrast, rules based economic integration involving East Asian States was traditionally limited to multilateral integration under the GATT/WTO framework. This book systematically analyses and explains the development, nature and challenges of rules based regional economic integration in East Asia with particular attention to the region's first four RTAs. While also addressing the socio-economic, historical and political factors influencing the development of RTAs in East Asia, the book focuses on the legal institutions governing economic integration in the Association of Southeast Asian Nations (ASEAN) as well as under the ASEAN-China Comprehensive Economic Co-Operation Agreement (ACFTA), the Japan-Singapore New Age Economic Partnership Agreement (JSEPA) and the Mainland China-Hong Kong Closer Economic Partnership Arrangement (CEPA). The book provides a systematic comparative account of the scope, depth and hard law versus soft law quality of rules based economic integration achieved under these four RTAs in the areas of trade in goods and services, investment liberalisation and protection, labour mobility and dispute settlement. ECMT Round Tables: Market Access, Trade in Transport Services and Trade Facilitation European Conference of Ministers of Transport, 2007-05-23 The Round Table discussed the role of the transport sector in supporting regional economic integration. The event was hosted by the Hellenic Institute of Transport, Thessaloniki. OECD Development Pathways: Multi-dimensional Review of Thailand (Volume 1) Initial Assessment OECD, 2018-04-09 The Initial Assessment of this Multi-Dimensional Review endeavors to identify the challenges and key constraints that must be overcome for Thailand to succeed.

Roadmap to an ASEAN Economic Community Denis Hew Wei-Yen, 2005 At the Ninth ASEAN Summit in Bali on 7 October 2003, the leaders of the Association of Southeast Asian Nations agreed to establish an ASEAN Economic Community (AEC) by 2020. It is envisaged that the AEC would be a single market and production base with a free flow of goods and services, investments, capital and skilled labour. An integrated ASEAN with a sizeable market of over 500 million people could become an alternative to China as a regional production base for MNCs. Although there are roadmaps for the fast track integration of eleven priority sectors, an overall longer term roadmap needs to be formulated to realize the

AEC This book addresses the main issues The Regulation of Subsidies Within the General Agreement on Trade in Services of the WTO Pietro Poretti, 2009-01-01 The General Agreement on Trade in Services GATS extends the multilateral trading system to services Little is said in the GATS about subsidies beyond stipulating that subsidies are subject to the existing provisions including the most favoured nation and national treatment principles and that Members shall enter into negotiations with a view to developing the disciplines necessary to avoid the trade distorting effects of subsidies This timely book provides a comprehensive analysis of services subsidies under the GATS It begins with a description of services and trade in services and of the salient characteristics that make regulation of services subsidies more complex than those associated with agricultural and industrial goods It then analyzes the economic arguments underpinning the need for regulation as well as the need for governments to retain sufficient latitude to implement non trade related policy measures A description of the information available on services subsidies is followed by a classification of services subsidies according to their distortive effects and by a detailed analysis of those elements that may form a definition of services subsidies for the purpose of a future regulatory framework A key section is devoted to the analysis of those existing provisions of the GATS that may exert a certain measure of discipline on services subsidies and to the question of the desirability and technical feasibility of countervailing measures Rules on services subsidies contained in regional trade agreements and the need for special and differential treatment for services subsidies by developing countries are also discussed Finally and prior to the conclusion two sectoral studies deal with the question of subsidies aimed at attracting foreign direct investment and subsidies to the audiovisual sector This work represents the first extensive and comprehensive analysis of the issue of services subsidies in the context of the GATS and includes numerous references to relevant European Union State Aid legislation and jurisprudence Book Jacket **The Economic Implications of Liberalizing APEC Tariff and Nontariff**
