The Art of Teaching Science Jack Hassard,Michael Dias,2013-07-04 The Art of Teaching Science emphasizes a humanistic experiential and constructivist approach to teaching and learning and integrates a wide variety of pedagogical learning tools These tools involve inquiry and experimentation reflection through writing and discussion as well as experiences with students science curriculum and pedagogy Becoming a science teacher is a creative process and this innovative textbook encourages students to construct ideas about science teaching through their interactions with peers professionals and instructors and through hands on minds on activities designed to foster a collaborative thoughtful learning environment

Teaching Inclusively in Higher Education Moira A. Fallon, Susan C. Brown, 2010-04-01 This book is designed for higher education instructors. The focus of the book is to assist all faculty instructors in higher education to better meet the needs of their student populations. It addresses the major issue of higher education teaching today: the need to reach all higher education students using active learning strategies. Higher education today is rapidly changing, and faculty members are being presented with new types of students: ones who often have clear goals for bettering themselves but at the same time lack what might have been considered to be basic skills necessary for success in a college or university setting. Instructors today must reach and bring all students into the college or university setting in an inclusive manner. The emphasis of this book is on student-focused strategies for teaching inclusively. This book will provide valuable strategies and practical techniques for instructors to develop inclusive college classrooms that promote the learning of all students. The audience targeted will be all instructors who work with higher education students, including students in community colleges and vocational institutions. The book is designed to be mainly practical instructional strategies with limited theoretical text and references. At the same time, major theories will be included to demonstrate why specific approaches are recommended. Although the authors and editors are from the field of education, the book is particularly valuable for all college instructors without a background in the discipline of education.

Handbook of Research on Facilitating Collaborative Learning Through Digital Content and Learning Technologies Keengwe, Jared, 2022-12-28 Digital content and learning technologies are now the norm at all levels of education. However, there is evidence to suggest that this digital shift is on a spectrum, and the spectrum impacts learners in different ways. This means that some instructors who seek to integrate digital content may do so using traditional teaching methods, while others use innovative practices to engage learners. Those who integrate innovative digital practices align their instructional practice with theories to facilitate student-centered pedagogies that support and improve the depth and scope of student learning. A primary characteristic of student-centered learning is facilitating collaborative learning using digital content and learning technologies to engage students as well as to enhance meaningful learning. The *Handbook of Research on Facilitating Collaborative Learning Through Digital Content and Learning Technologies* provides K-20 educators with alternative pedagogical and andragogical models that are innovative and incorporate digital content and learning technologies that promote constructive learning. Further, this book explores the relationship between constructivist learning, digital content, and learning technologies. A primary argument in this book is that constructivist teaching strategies such as collaborative learning, coupled with digital content and purposeful learning technologies, could benefit student learning in ways that are different from those practiced in traditional non-digital learning environments. Covering topics such as instructional design, self-efficacy, and library engagement, this major reference work is an essential resource for pre-service teachers, teacher educators, faculty, and administrators of K-20 education, librarians, researchers, and academicians.
