Science, Technology and the Cultural Cold War in Asia Yuka Moriguchi Tsuchiya,2022-07-12 Tsuchiya presents a new insight into the political roles of science and technology during the Cold War era in Asia The Cold War was not only a battle of conflicting ideologies and economic systems but also a competition of cultures and lifestyles and a battle to win the hearts and minds of people in developing countries Tsuchiya argues that science and technology were an integral part of how culture was deployed strategically She discusses the 1950s and early 1960s the Eisenhower and Kennedy presidencies in the U S and the decolonization and nation building efforts in Japan South Vietnam Burma and Indonesia She also sheds light on the way U S technological aid programs such as Foreign Atoms for Peace and the overseas information program were received by Asian leaders technocrats and scientists Provides valuable insight for scholars of Cold War History in Asia and US Foreign Policy *Finding Her in History* Rosemary Papa,2017-06-16 This monograph was cultivated from the AERA SIG Women in Education 2016 address and delivers a brief review of his story in terms of the lack of her story being included through three parallel lines 1 historical documents on formation of the family and work in and outside the home from the Paleolithic era 2 the development of traditional religions and the subjugation of women beginning with the conniving seductress Eve and 3 the discussion of major wars and the nation state policies produced throughout history with impacts on girls and women as well the precarious health of the planet This brief review of his story reveals the continued exclusion of her story with the example of Willystine Goodsell a historian ironically erased from history in education The premise that

subjugation of women and children as lesser than males has been supported both in the name of protecting them and in shaming them. The combined ubiquitous effects of disequilibrium created by mankind in wars, religions, education, social capital, economics, and politics have ensured his story is the one recorded. This monograph suggests a more balanced approach to the written her/his story requires inclusion of all the population and the secular educating of especially girls and women.

Remembering the space age: Proceedings of the 50th Anniversary Conference, Proceedings of October 2007 conference sponsored by the NASA History Division and the National Air and Space Museum to commemorate the 50th anniversary of the Sputnik 1 launch in October 1957 and the dawn of the space age. Reading Raps Rita Soltan, 2005-12-30

Book clubs are sprouting up all over and so are book club guides but not all book club guides are equal. Many focus on a specific type of book club or they take a generic approach of one size fits all and most do not take into account the special needs of librarians and educators working with young readers. This guide has it all and it will help you ensure that your book club meetings are both fun and educational. Focusing on children in grades 3-8 and their families, the book offers 100 ready-made book club instructions for popular children's and YA titles from newer releases such as Theresa Nelson's *Ruby Electric* and Blue Balliett's *Chasing Vermeer* to perennial favorites and award-winning classics such as Johanna Hurwitz's *Much Ado about Aldo* and Gary Soto's *Baseball in April and Other Stories*. Along with thought-provoking discussion questions you'll find all the background information you need to conduct lively book discussions with a variety of readers: plot summary, themes, and characters description, genre, reading level, author, and award information, related reads, and more. The guide describes four types of family-oriented book clubs: family, mother-daughter, father-son, and readers' rap, as well as a book club for kids only. The author provides practical instructions for making each type of book club successful. For each title, she provides a plot summary, characterization sketches, questions to use for provocative discussion, and follow-up bibliographies on similar reads. Notes on genres, themes, and reading levels are also provided. The selected titles reflect some of the best, most current, and most popular children's literature. In addition, a broad scope of genres and multicultural titles are included. Perfect for public library programs and after-school book clubs, this is a one-stop resource with practical, ready-made plans that can easily be adapted to multiple environments. Grades 3-8.

Handbook of Research on Children's and Young Adult Literature
Shelby Wolf, Karen Coats, Patricia Enciso, Christine Jenkins, 2011-04-27

This landmark volume is the first to bring together leading scholarship on children's and young adult literature from three intersecting disciplines: Education, English, and Library and Information Science. Distinguished by its multidisciplinary approach, it describes and analyzes the different aspects of literary reading texts and contexts to illuminate how the book is transformed within and across different academic figurations of reading and interpreting children's literature. Part one considers perspectives on readers and reading literature in home, school, library, and community settings. Part two introduces analytic frames for studying young adult novels, picturebooks, indigenous literature, graphic novels, and other genres. Chapters include commentary on literary experiences.

and creative production from renowned authors and illustrators Part three focuses on the social contexts of literary study with chapters on censorship awards marketing and literary museums The singular contribution of this Handbook is to lay the groundwork for colleagues across disciplines to redraw the map of their separately figured worlds thus to enlarge the scope of scholarship and dialogue as well as push ahead into uncharted territory **Spacefarers** Michael J. Neufeld, 2013-11-06

The recent 50th anniversaries of the first human spaceflights by the Soviet Union and the United States and the 30th anniversary of the launching of the first U S Space Shuttle mission have again brought to mind the pioneering accomplishments of the first quarter century of humans in space Historians political scientists and others have extensively examined the technical programmatic and political history of human spaceflight from the 1960s to the 1980s but work is only beginning on the social and cultural history of the pioneering era One rapidly developing area of recent scholarship is the examination of the images of spacefarers in the media government propaganda and popular culture How was space travel imagined in the visual media on the cusp of human spaceflights How were astronauts and cosmonauts represented in official and quasi official media portraits And how were those images reproduced and transformed by in the imagination of film makers movie producers popular writers and novelists Spacefarers addresses these questions with nine contributions from scholars in the field of aerospace history Russian and American history and English literature These essays are preceded by an introduction by the editor who discusses their place in the historiography of spaceflight and social and cultural history The book will have potential appeal to a wide variety of scholars in history literature and the social sciences and will include a number of striking visual images
