*Incest Avoidance and the Incest Taboos* Arthur P. Wolf, 2014-04-16 Why do most people never have sex with close relatives And why do they disapprove of other people doing so Incest Avoidance and Incest Taboos investigates our human inclination to avoid incest and the powerful taboo against incest found in all societies Both subjects stir strong feelings and vigorous arguments within and beyond academic circles With great clarity Wolf lays out the modern assumptions about both concluding that all previous approaches lack precision and balance on insecure evidence Researchers he calls constitutionalists explain human incest avoidance by biologically based natural aversion but fail to explain incest taboos as cultural universals By contrast conventionalists ignore the evolutionary roots of avoidance and assume that incest avoidant behavior is guided solely by cultural taboos Both theories are incomplete Wolf tests his own theory with three natural experiments bint amm cousin marriage in Morocco the rarity of marriage within Israeli kibbutz peer groups and minor marriages in which baby girls were raised by their future mother in law to marry an adoptive brother in China and Taiwan These cross cultural comparisons complete his original and intellectually rich theory of incest one that marries biology and culture by accounting for both avoidance and taboo
