Tucker, Nicholas B. Breyfogle, Peter Mansoor, 2020-04-02 World War II was the largest and most destructive conflict in human history It was an existential struggle that pitted irreconcilable political systems and ideologies against one another across the globe in a decade of violence unlike any other There is little doubt today that the United States had to engage in the fighting especially after the Japanese attack on Pearl Harbor on December 7 1941 The conflict was in the words of historians Allan Millett and Williamson Murray a war to be won As the world s largest industrial power the United States put forth a supreme effort to produce the weapons munitions and military formations essential to achieving victory When the war finally ended the finale signaled by atomic mushroom clouds over Hiroshima and Nagasaki upwards of 60 million people had perished in the inferno Of course the human toll represented only part of the devastation global environments also suffered greatly The growth and devastation of the Second World War significantly changed American landscapes as well The war created or significantly expanded a number of industries put land to new uses spurred urbanization and left a legacy of pollution that would in time create a new term Superfund site **Air Corps News Letter** , 1967 *Strategic Planning for Coalition Warfare: 1943-1944*

Victory at Sea Paul M. Kennedy, 2022-01-01 A sweeping lavishly illustrated one volume history of the rise of American naval power during World War II When he is at his best as he often is in these pages Kennedy can be dazzling Ian W Toll New York Times The book makes for enjoyable reading owing to the author's easygoing style Kennedy is an academic who does not write like one he writes a story not a treatise Robert D Kaplan Washington Post Engrossing Brendan Simms Wall Street Journal In this engaging narrative brought to life by marine artist Ian Marshall's beautiful full color paintings historian Paul Kennedy grapples with the rise and fall of the Great Powers during World War II Tracking the movements of the six major navies of the Second World War the allied navies of Britain France and the United States and the Axis navies of Germany Italy and Japan Kennedy tells a story of naval battles maritime campaigns convoys amphibious landings and strikes from the sea From the elimination of the Italian German and Japanese fleets and almost all of the French fleet to the end of the era of the big gunned surface vessel the advent of the atomic bomb and the rise of an American economic and military power larger

than anything the world had ever seen Kennedy shows how the strategic landscape for naval affairs was completely altered between 1936 and 1946

Range Wars Ryan H. Edgington, 2014-07-01 Established in south central New Mexico at the end of World War II White Sands Missile Range is the largest overland military reserve in the western hemisphere It was the site of the first nuclear explosion the birthplace of the American space program and the primary site for testing U S missile capabilities In this environmental history of White Sands Missile Range Ryan H Edgington traces the uneasy relationships between the military the federal government local ranchers environmentalists state game and fish personnel biologists and ecologists state and federal political figures hunters and tourists after World War II as they all struggled to define and productively use the militarized western landscape Environmentalists ranchers tourists and other groups joined together to transform the meaning and uses of this region challenging the authority of the national security state to dictate the environmental and cultural value of a rural American landscape As a result White Sands became a locus of competing geographies informed not only by the far reaching intellectual economic and environmental changes wrought by the cold war but also by regional history culture and traditions

Eisenhower's Nuclear Calculus in Europe Gates Brown, 2018-11-30 Through a reliance on nuclear weapons President Eisenhower hoped to provide a defense strategy that would allow the U S to maintain its security requirements without creating an economic burden This defense strategy known as the New Look benefited the U S Air Force with its focus on strategic nuclear weapons The U S also required European missile bases to deploy their intermediate range ballistic missiles while efforts continued to develop U S based intercontinental ballistic missiles Deploying such missiles to Europe required balancing regional European concerns with U S domestic security priorities In the wake of the Soviet Sputnik launch in 1957 the U S began to fear Soviet missile capabilities Using European missile bases would mitigate this domestic security issue but convincing NATO allies to base the missiles in their countries raised issues of sovereignty and weapons control and ran the risk of creating divisions in the NATO alliance

The Irish and British Wars, 1637-1654 James Scott Wheeler, 2003-10-03 With numerous maps and illustrations James Scott Wheeler connects the strategic and tactical levels of war with political actions and reactions and discusses how Britain and Ireland became battlegrounds in the war of three kingdoms The various stages of this period of turmoil are clearly demonstrated right through to the execution of Charles I the conquest of Catholic Ireland and the eventual death of the English Republic and provide students of history with an excellent addition to their studies
