Younger for Longer Dr Duncan Carmichael,2018-12-06 Revelatory and accessible Sunday Post Dr Carmichael has studied nutrition hormone balancing and aesthetic medicine and his passion on which he lectures globally is healthy ageing His approach in his fascinating new book Younger for Longer is scientific and holistic The Times Be good to yourself Younger for Longer features wisdom on nutrition sleep mood regulation and most importantly hormonal health for men and women Scotsman I have not stopped learning on my Low Carb Healthy Fat journey Younger for Longer continues that process for me with an incredibly well referenced text It s refreshing to see the balance of nutrition and lifestyle discussed in such an informed and robust manner Gary Fettke orthopaedic surgeon health activist and author Younger for Longer tells you exactly what you need in order to live an extended healthy life It s very 80 20 and one of the best books I ve read in ages Richard Koch author of million seller The 80 20 Principle Fascinating Packed with the most incredible information about health Radio Today South Africa Offers valuable honest and solid medical insights into how you

can age better It is without doubt one of the best books I have read in my many years as a health activist Longevity magazine Targeted at the general reader the goal of this book is to show readers how to live a healthy life free from the debilitating effects of ageing helping them to stay mentally alert and physically active and making sure they get the most out of all of their years It reveals practical steps to slow the ageing process and stay healthy in short how to stay younger for longer With research showing that obesity nutrition and lifestyle illnesses can hamper our body's response to Covid 19 such advice has become even more crucial in reducing Covid 19 risk factors The key is to aim for optimal health However focussing on one factor alone will not get us there Our sleep our mood what we eat our detoxification system and our hormones are just some of the factors that interact in amazing ways to make us who we are they are also at the very heart of the ageing process This book shows how these different strands combine in ways that can be positive or negative and explains why this interaction depends far more on the lifestyle we choose than on the genes we inherit In that way it gives the reader a unique and comprehensive understanding of their body and tells them how with this knowledge they can optimise their health The topics range from nutrition toxins men's health and women's health to understanding why our skin brain and liver age and how to undo the damage and stave off ageing But the book's main focus underlying all of this is hormones the chemicals that tell different parts of our body what to do Our hormone levels vary throughout our life but if they are supported correctly they can keep us youthful and vital into our final years Finding health then is not about seven ways to detox or the five best vitamins The body is far more complex than that and in an approach aimed specifically at the layperson Younger for Longer traces the exciting path of how the body works to help the reader create the best person they can be for the rest of their life

the first systematic study of Vygotsky's family archive. The notebooks and scientific diaries gathered in this volume represent all periods of Vygotsky's scientific life beginning with the earliest manuscript entitled *The tragicomedy of strivings* 1912 and ending with his last note entitled *Pro domo sua* 1934 written shortly before his death. The notes reveal unknown aspects of the eminent psychologist's personality; show his aspirations and interests and allow us to gain insights into the development of his thinking and its internal dynamics. Several texts reflect the plans that Vygotsky was unable to realize during his lifetime such as the creation of a theory of emotions and a theory of consciousness; others reveal Vygotsky's involvement in activities that were previously unknown and still others provide outlines of papers and lectures. The notes are presented in chronological order preceded by brief introductions and accompanied by an extensive set of notes. The result is a book that allows us to obtain a much deeper understanding of Vygotsky's innovative ideas.

Age as an Equality Issue Sandra Fredman, Sarah Spencer, 2003-07 Until recently age discrimination attracted little social opprobrium However ageism has now been thrust onto the equality agenda by the spectre of an ageing population This has led to a range of policies on active ageing Most importantly legally binding legislation prohibiting age discrimination in employment will need to be in place by 2006 Remarkably little attention has been paid to the key issues To what extent is age inevitably linked with declining capacity What are the central aims of a policy on age equality and how can these be realised in law How should law and policy address age discrimination in health education and employment What lessons can be learned from the US and Europe And should young people be dealt with in the same way as older people This book answers these questions in a series of chapters by experts from a wide range of disciplines It begins by examining the nature of the ageing process and then turns to a detailed analysis of the concept of age equality In the light of this analysis the following three chapters critically assess employment education and health A separate chapter is devoted to discrimination against children The last two chapters consider the experience in the US and other European countries
