Cognitive Behavioural Prevention of Suicide in Psychosis Nicholas Tarrier,Patricia Gooding,Daniel Pratt,2013 This practical and informative text lays out the product of a number of years of clinical research into suicide behaviour and its prevention While the focus is on non affective psychosis and the schizophrenia spectrum disorders the mechanisms underlying suicide behaviour in this group may well underlie or at least influence suicide behaviour in other disorders The authors describe methods of assessment through individual formulation and a cognitive behavioural intervention through case studies to reduce the risk of suicide This book argues that Suicide behaviour lies on a cognitive behavioural continuum from ideation through intention to action Mechanisms based on biased information processing systems the development of suicide schema and appraisal styles are likely to be fruitful in explaining suicidal thoughts and behaviours A psychological

theory of suicide behaviour is needed in order to develop a mechanism of suicide and to understand the components of suicidal thoughts and behaviours Suicide risk can be reduced through the use of the intervention methods described within the text Cognitive Behavioural Prevention of Suicide in Psychosis evaluates practical applications of contemporary research on this topic and will therefore be of interest to practitioners post graduates in training and researchers studying suicide and or psychosis

Mechanisms Underpinning the Link between Emotion, Physical Health and Longevity Andrew H. Kemp, 2017-09-13

The 1990 s was designated as the decade of the brain and now common mental disorders are described as brain disorders Yet intense research interest on the brain has largely side lined the body as a passive observer disconnecting mental from physical health and contributing to further societal stigma on the nature of psychiatric illness and mental distress The biopsychosocial pathway to premature mortality or longevity is a complex one involving a host of closely intertwined mechanisms and moderating factors some of which are investigated in this special issue All the articles published here provide new insights into the pathways linking emotion physical health and longevity highlighting the tight linkage between mind brain and body
