Between 1945 and 1990 the Western Allies mounted some of the most audacious and successful intelligence collection operations of the Cold War Conducted in great secrecy aircrews flew specially modified transport and training aircraft along the Berlin Air Corridors and Control Zone to gather intelligence on Soviet and East German military targets in the German Democratic Republic and around Berlin The Air Corridors comprised three regulated airways for civil and military air traffic that connected West Berlin to West Germany Operating under the guise of innocent transport and training flights the pilots used their right of access to gather huge amounts of imagery for forty five years They also provided the western intelligence community with unique knowledge of the organisation and equipment used by Warsaw Pact forces For the first time using recently declassified materials and extensive interviews with those involved Looking Down the Corridors provides a detailed account and analysis of these operations and their unique contribution to the Cold War

This book first published in 1965 illustrates the world of management in the airline industry. It examines the external relations with customers, government, investors, suppliers, and competitors, as well as internal relations within the business, such as organization and industrial relations. **Military Air Transportation** United States. Congress. House. Committee on Government Operations, 1959 **Flying**, 1919 National Transportation Safety Board Decisions United States. National Transportation Safety Board, **Approach**, 1980-07 The naval aviation safety review U.S. International Aviation Policy United States. Congress. House. Committee on Public Works and Transportation. Subcommittee on Investigations and Oversight, 1988 Evolution of International Aviation Dawna L. Rhoades, 2016-04-15 The purpose of this book is twofold. First, it lays out the forces that shaped the international aviation industry and that changed all the rules in the drive for liberalization. Second, it looks at the many interesting and difficult choices ahead that the airline industry in general and the international aviation industry in particular face. These choices include many dichotomies: pulling back from the trend toward liberalization or embracing the liberalization trend; merging in search of profitability or fragmenting the industry in search of economies. These possible futures are explored, including the pros and cons of each, from a national consumer, employer, and employee perspective. As with the previous two editions, *Evolution of International Aviation* reviews the historical development of the international aviation system. From this foundation, it then provides an updated and expanded account of the current state of the aviation and aerospace industry, including profitability, consolidation, and merger activity. New to this edition, the book broadens the coverage of the industry segments: airlines, air cargo, and manufacturing, to include the emerging commercial space sector. It also emphasizes the relationship between aviation and the political process, exploring the sustainability of this mode of transportation in a world of climate change, high oil prices, and political instability. Because this book is intended for both the interested amateur and the more serious student, references are provided in the text and at the end of each chapter to allow for further in-depth study. The third edition also adds to each chapter a set of learning objectives and a concluding series of questions for discussion. **United States Army Aviation Digest**, 1966

Oral History of Germans Taken To the USSR with Their Obsolete DFS 346-Part 1 David Myra PhD, 2013-09-23 This is an oral history of several dozens of German aviation designers and engineers that were taken to the Soviet Union in October 1946 along with their DFS 346. The information contained here has never been made public until now. Dr. Myra traveled to all the places mentioned and, with the assistance of language interpreters Margarita Reck of Salem, Neufrach, West Germany, and Gerhard Hopf of Naples, FL, was able to communicate with the German-speaking engineers and designers. These are the unedited transcriptions of the actual conversations. Very interesting material. Look for future volumes of this rare and informative documentation. Enjoy.
