Vanishings in National Parks and Else where. An Inside Look. Pat Dwyer, 2024-12-26 Some people vanish How why and where This book explores the mysterious process

Captured by Aliens Joel Achenbach, 2003 The great minds of the human race employing ever more fabulous technology have peered into the depths of space and discovered that we exist on a tiny speck in a universe that is vast beyond comprehension But there is one thing we have yet to discover a single scrap of extraterrestrial life We have heard no signals found no alien picnic trash The aliens who allegedly abduct people in the middle of the night have a strange way of evaporating in the harsh glare of scientific scrutiny And so at the turn of the millennium we are in an intellectual fix we know the universe only through its structure its physical properties its chemistry Of its biology we can only guess Are there creatures out there like us with big brains and restless spirits Or are we for all intents and purposes alone If aliens exist if there really are intelligent creatures zooming around the galaxy then where in our nation are they Washington Post reporter Joel Achenbach the author of *Why Things Are* and a commentator for National Public Radio puts the ET debate into the context of the space program discoveries in astronomy and the hunger for meaning and spiritual nourishment in an era when science often doesn't provide the answers that people desire He finds that the topic of extraterrestrial life is poisoned by wishful thinking by the natural human yearning to make contact with our brothers and sisters in space But he also finds some fascinating admirable and maddening characters who have pursued the truth about extraterrestrial life Carl Sagan the brilliant astronomer who brought the cosmos to the masses Dan Goldin the cantankerous head of NASA who still believes in the dream of the Space Age Henry Harris a former Las Vegas lounge singer who is assigned the job of figuring out how to get a spaceship to Alpha Centauri and various and sundry ufologists experiencers spiritualists and channelers for whom the aliens are an ever present reality In this fascinating funny and spirited book Achenbach discovers that the search for life

elsewhere leads us on a looping road back to the fundamental questions about life on Earth To think coherently about extraterrestrial life we first must come to terms with who we are why we exist and what it means to carry around in our cells an evolutionary history that took four billion years to unfold Achenbach's message is that it is a wonderful and thrilling thing to be a sentient human being a creature capable of foolish romanticism in a universe that is mostly rocks and gas and dust and empty space

UFO Garrett M. Graff, 2024-11-12 One of the rare books on the topic that manages to be both entertaining and factually grounded. The Wall Street Journal. From the bestselling author of *Raven Rock*, *The Only Plane in the Sky*, and *Watergate*, finalist for the Pulitzer Prize in history, comes the first comprehensive and eye-opening exploration of our government's decades-long quest to solve one of humanity's greatest mysteries: Are we alone in the universe? For as long as we have looked to the skies, the question of whether life on earth is the only life to exist has been at the core of the human experience, driving scientific debate and discovery, shaping spiritual belief and prompting existential thought across borders and generations. It's one of our culture's favorite conversations, and yet the idea of extraterrestrial intelligence has been largely banished to the realm of fantasy and conspiracy. Now, for the first time, the full story of our national obsession with UFOs and the covert search by scientists, the United States military, and the CIA for proof of alien life is told by bestselling author and Pulitzer Prize finalist Garrett M. Graff in a deeply reported and researched history. It begins in 1947 when two headline-making sightings of strange flying objects prompt the US Air Force's newly formed Department of Defense to create a series of secret programs to determine how unidentified phenomena may pose a threat to national security. Over the next half century, as the atomic age gives way to the space race and the Cold War, the mission continues, bringing together an unexpected group of astronomers, military officials, civilian contactees, and true believers who bring us closer, then further, then closer again to answering one of our most enduring questions: What exactly is out there? Drawing from original archival research, declassified documents, and interviews with senior intelligence and military officials, Graff brings readers a story that's loads of fun, a fascinating deep dive down the rabbit hole. Publishers Weekly

CAP2005 Conference Proceedings, UFOs and Abductions David Michael Jacobs, 2000 Examining the nature of UFO evidence, the authors present a primer for scholars, skeptics, and others uneasy about investigating the field of UFOs. The volume also brings together three bestselling authors: David M. Jacobs, Budd Hopkins, and Pulitzer Prize winner John Mack, widely known for their writings on the controversial alien abduction phenomenon.
