Looking At China:

China Walter F. Mondale, 1979 **China's Negotiating Mindset and Strategies** Guy Olivier Faure, I. William Zartman, 2025-06-30 This book analyzes the mindset with which China enters into negotiations and applies these insights into contemporary arenas of Chinese activity around the world. The volume presents and analyses the historical and cultural foundations of Chinese thinking as used in the practice of present day negotiation. It begins by addressing the essence of Chinese negotiations and the Chinese mindset, turning to a section that presents the cultural foundations of that mindset and strategy. The concepts of Confucianism, Taoism, Yin Yang and Chinese military strategy are highlighted. The cases of the Belt and Road Initiative and the South and East China Seas are examined to show the application of these concepts with one addressing business and economic negotiations and the other examining cases of negotiation in geopolitics. Finally, a synthesis of what has been learned is presented, which will contribute to negotiation theory and ultimately will help Western practitioners contemplating negotiation with Chinese diplomats and businesses, as well as being a basis for policy analysts' understanding of Chinese practices in international relations. This book will be of much interest to students of international negotiation, foreign policy, business studies and international relations, as well as practitioners and policymakers. *Looking for Balance* Steve Chan, 2013-07-15 Debate surrounding China's rise and the prospects of its possible challenge to America's preeminence has focused on two questions: whether the United States should contain or engage China, and whether the rise of Chinese power has inclined other East Asian states to balance against Beijing by alignment with the United States or ramping up their military expenditures. By drawing on alternative theoretic approaches, most especially balance of threat theory, political economic theory and theories of regime survival and economic interdependence, Steve Chan is able to create an explanation of regional developments that differs widely from the traditional strategic vision of national interest. He concludes that China's primary aim is not to match U.S. military might or the foreign policy influence that flows from that power, and that its neighbors are not balancing against its rising power because, in today's guns versus butter fiscal reality, balancing policies would entail forfeiting possible gains that can accrue from cooperation, economic growth and the application of GDP to nonmilitary ends. Instead, most East Asian countries have collectively pivoted to a strategy of elite legitimacy and regime survival based on economic performance. **The Urban Code of China** Dieter Hassenpflug, 2012-12-13 When reading the Chinese city, which this book sets out to do, it is not the well known cities such as Beijing, Shanghai and Xi'an that are in the focus of attention, but rather the essentially Chinese of the Chinese city, those characteristics or attributes that are more or less shared by all Chinese cities. The spotlight is on their spatial grammar, their syntax, in short, their code. Only by deciphering their common traits, a view to the underlying structure of Chinese cities is opened, and we can begin to reasonably evaluate and classify the diversity of impressions. Deciphering the code of the Chinese city also enables the author to read new Chinese towns designed by Western architects. Thus, readers are provided

with valuable insight on China's booming urbanization and urban development **Look Again at China** Willis Church Lamott, 1948 **Looking Toward Sunset**, 1883 **Engineers and Engineering**, 1920 **China's Millions**, 1900

Australia-China Relations post 1949 Yi Wang, 2016-04-08 This book challenges the common perceptions of Australian dependence upon great power allies in the conduct of its foreign relations through a critical examination of Australia's relations with the People's Republic of China. The author focuses on the economic and political dimensions of the policy making process from the founding of the PRC in 1949 to the present era against an analytical framework that takes into account both internal and external factors in the formulation and implementation of Australian foreign policy. Informed by political science and international relations, the book differs from the conventional literature on Sino-Australian relations which has either focused on pure economic analysis or concentrated on chronicling historical events. The author weaves theoretical insights from political science and international relations into the historical analysis while seeking to examine the interplay between political and economic factors over time in shaping policy outcomes. The book draws not only on primary and secondary sources but also on information and insights obtained from interviews with a vast array of direct participants in the policy process including almost all the former ambassadors from both China and Australia covering the entire period of the diplomatic relationship. As a result, the book breaks new ground especially from the Hawke era onwards, revealing hitherto overlooked details of interest in the policy process.

Will China still be a repressive and undemocratic regime embracing free market economics but only when it suits? How aggressive a superpower will it be? And what about India whose huge and growing population and economic prospects appear to guarantee prosperity? David Smith analyses the ways in which the world is tilting rapidly Eastwards and examines all the implications of the shift in global

power to Beijing Delhi and Washington a shift that will creep up on us before we know it
