Additionally, the Encyclopedia includes some 200 essays treating the development of national, regional and topical historiographies from the Ancient Near East to the history of sexuality. In addition to the Western tradition, it includes substantial assessments of African, Asian and Latin American historians and debates on gender and subaltern studies. *History of Technology Volume 30* Ian Inkster, Angel Calvo, 2011-03-31 This book focuses on the development of four key issues in the development of modern Spain: knowledge, manufacturing, energy and telecommunications and public works. If technology transfer from advanced nations to less developed systems always worked, then the whole world would now be rich. That this is not the case is so obvious we might well expect that the history of the processes, successes and failures of technology transfer across nations would be a very well established field of enquiry. In fact, the theme is still a developing one and the present Special Issue centres on the case of Spain as exemplary in many respects. The collected essays focus upon the four major themes of knowledge, manufacturing, energy and telecommunications and public works. Essays range in time from the 18th century to the present time, from studies of espionage and early links between craftsmen and savants to the institutions of technology, from training systems to private enterprise activity or patents to case studies of silk manufacture, shipbuilding, mining, paper making and pharmaceuticals. Each essay offers a broad variety of material to bring to bear on a major problem of world development, past, present and future. History of Commerce and Industry Cheesman Abiah Herrick, 1917
