Looking For Answers Conversations On Art And Science:

Looking for Answers Ernst Hans Gombrich, Didier Eribon, 1993 People know me as the author of *The Story of Art* who have never heard of me as a scholar But many of my colleagues have never read the book They may have read my papers on Poussin or Leonardo but not that It is a curious double life Sir Ernst Gombrich is one of the very few men able to lead such a double life as familiar to the general public as to academicians Recently the French intellectual Didier Eribon engaged in a series of probing conversations with Gombrich seeking to discover how his mind and attitudes had been formed during his early years in Vienna and how they developed after he emigrated to England in 1939 There Gombrich wrote *The Story of Art* his acclaimed introductory art survey and became director of the Warburg Institute in London The result of the dialogue between these two men is found in this fascinating and thought provoking volume Gombrich tells of reading examining pondering and talking to numerous historians psychologists artists and philosophers among them Erwin Panofsky Karl Popper Oskar Kokoschka and Konrad Lorenz about subjects ranging from art history to biology and zoology The reader observes one of our century's most acute minds as he informally brings together all the themes that have preoccupied him for over sixty years the meaning of paintings especially those of the Renaissance the relation between representational art and perception and the way in which our responses are conditioned by conventions history social pressures and changes of taste As undogmatic skeptical and wide ranging as ever Gombrich not only provides a brilliant account of his life's work but also makes us think anew about fundamental issues provoking as many questions as he answers Psychology, Art, and Antifascism Louis Rose, 2016-09-15 A vivid portrait of two remarkable twentieth century thinkers and their landmark collaboration on the use and abuse of caricature and propaganda in the modern world In 1934 Viennese art historian and psychoanalyst Ernst Kris invited his mentee E H Gombrich to collaborate on a project that had implications for psychology and neuroscience and foreshadowed their contributions to the Allied war effort Their subject caricature and its use and abuse in propaganda Their collaboration was a seminal early effort to integrate science the humanities and political awareness In this fascinating biographical and intellectual study Louis Rose explores the content of Kris and Gombrich's project and its legacy The postsocialist contemporary Octavian Esanu, 2021-11-23 The postsocialist contemporary joins a growing body of scholarship debating the definition and nature of contemporary art It comes to these debates from a historicist perspective taking as its point of departure one particular art programme initiated in Eastern Europe by the Hungarian American billionaire George Soros First implemented in Hungary the Soros Center for Contemporary Art SCCA expanded to another eighteen ex socialist countries throughout the 1990s Its mission was to build a western open society by means of art This book discusses how network managers and artists participated in the construction of this new social order by studying the programme's rise evolution impact and broader ideological and political consequences Rather than recounting a history it engages critically with contemporary art as the aesthetic paradigm of late capitalist market

The Geometry of an Art Kirsti Andersen, 2008-11-23 Key Issues ver since the late 1970s when Pia Holdt a student of mine at the time and Jed

Buchwald a colleague normally working in another field made me aware of how fascinating the history of perspective constructions is I have wanted to know more My studies have resulted in the present book in which I am mainly concerned with describing how the understanding of the geometry behind perspective developed and how and to what extent new insights within the mathematical theory of perspective influenced the way the discipline was presented in textbooks In order to throw light on these aspects of the history of perspective I have chosen to focus upon a number of key questions that I have divided into two groups Questions Concerning the History of Geometrical Perspective How did geometrical constructions of perspective images emerge How were they understood mathematically How did the geometrical constructions give rise to a mathematical theory of perspective How did this theory evolve In connection with the last question it is natural to take up the following themes

Aesthetic Life Harry Redner, 2007 Harry Redner's *Aesthetic Life* examines the arts all the arts from the earliest Paleolithic painting to the latest post Modern music Its aim is to account for the nature of art in its historical totality and to assess the role it has played in human life throughout the ages In seeking to review the history of art in all civilizations and separate cultures this work is intensely aware of the critical state of the arts towards which this history seems to be heading None of the great artistic cultures has survived intact as a living tradition All have been more or less consigned to museums the mausoleums of dead art India China Japan Byzantium Persia all the sources of the heritage of great art have dwindled away The last of these Europe also faltered in the course of the twentieth century which began with so much hope it seemed for a while that the Modernist upsurge of rebellious energy was to be the first stage of a new culture In the present anarchic age of post Modernism where anything goes it has become apparent that Modernism was merely the last stage of European culture With all these great traditions gone *Aesthetic Life* asks What is to be done about art now and considers possible answers
