Maritime History at the Crossroads Frank Broeze, 2017-10-18 This volume seeks to critically review the contemporary state of maritime historiography as it stands at the volume's publication date of 1995. The volume is comprised of thirteen essays each focused on the recent research into the maritime concerns of a particular geographical location listed as follows: Australia, Canada, China, Denmark, Germany, Greece, Ibero America, India, the Netherlands, the Ottoman Empire, Spain, the United States, and a final chapter concerning historians and maritime labour in Britain, Australia, and New Zealand. One concern made evident by the collection is the lack of stable identity and cohesive aims within maritime history; the subject holds many conflicting definitions and concepts. The purpose of this volume is to explore the recent developments in maritime history plus the growth of scholarly interest to provide a beacon and stimulus for future work and to clearly direct and define maritime historiography toward a solid position in the field of history.

Cultura y conciencia imperial en la España del siglo XIX Alda Blanco, 2015-05-16 Mitjanant una exploració de diverses representacions culturals que es van dur a terme en la segona meitat del segle XIX aquest volum mostra que en l'imaginari de l'Espanya metropolitana de l'època existia una identitat imperial que ha desaparegut quasi per complet de la historiografia contemporània. L'autora analitza les petjades de l'imperi que es troben en l'Exposició de les Illes Filipines a Madrid 1887 i la commemoració del IV Centenari del Descobriment d'Amèrica 1892 entre altres representacions del repertori simbòlic de l'imaginari nacional i explora una sèrie de textos objectes i pràctiques culturals que posen de manifest aquella consciència imperial que fins a ben entrat el segle XX estava imbricada en la identitat de la nació malgrat haver patit l'imperi dues importants descolonitzacions en 1824 i en 1898.

The Christopher Columbus Encyclopedia Silvio A. Beding, 2016-02-08 The European discovery of the Americas in 1492 was one of the most important events of the Renaissance and with it Christopher Columbus changed the course of world history. Now five hundred years later this 2 volume reference work will chart new courses in the study and understanding of Columbus and the Age of Discovery. Much more than an account of the man and his voyages, The Christopher Columbus Encyclopedia is a complete A-Z look at the world during this momentous era. In two volumes The Christopher Columbus Encyclopedia contains more than 350 signed original articles ranging from 250 to more than 10 000 words written by nearly 150 contributors from around the world. The work includes cross references bibliographies for each article and a comprehensive index. The work is fully illustrated with hundreds of maps drawings and photographs.

A Synoptic Edition of the Log of Columbus's First Voyage Francesca Lardicci, Valeria Bertolucci Pizzorusso, Cynthia L. Chamberlin, Blair Sullivan, 1999 Columbus left written records of each of the four voyages to the Indies he made as the envoy of the king and queen of Spain compiled as the circumstances of his life grew more complicated with the political and governmental problems associated with the exploration and colonization of the New World. The journals which Columbus

wrote for each voyage have been lost and Columbus's own writings are composed entirely of narrative letters corresponding to single phases of expeditions. One exception is this text: Columbus's Log, transmitted in a single manuscript and written in the hand of Las Casas. The document is not a complete copy but a version that is in part a summary and in part a literal transcription of a source described at its outset as *Libro de la primera navegacion y descubrimiento de estas Indias*. The original Columbian text was probably delivered to the king and queen at Barcelona in April 1493 on the return from his first voyage. This edition comprises an introduction, English translations of the three texts (DB, FH, and LC), and critical editions of the three Spanish original texts plus commentary.

Columbus's Outpost Among the Taínos Kathleen A. Deagan, José María Cruxent, 2008-10-01 In 1493 Christopher Columbus led a fleet of 17 ships and more than 1200 men to found a royal trading colony in America. Columbus had high hopes for his settlement, which he named La Isabela after the queen of Spain, but just five years later it was in ruins. It remains important, however, as the first site of European settlement in America and the first place of sustained interaction between Europeans and the indigenous Tainos. Kathleen Deagan and José María Cruxent tell the story of this historic enterprise. Drawing on their ten-year archaeological investigation of the site of La Isabela, along with research into Columbus-era documents, they contrast Spanish expectations of America with the actual events and living conditions at America's first European town. Deagan and Cruxent argue that La Isabela failed not because Columbus was a poor planner but because his vision of America was grounded in European experience and could not be sustained in the face of the realities of American life. Explaining that the original Spanish economic and social frameworks for colonization had to be altered in America in response to the American landscape and the non-elite Spanish and Taino people who occupied it, they shed light on larger questions of American colonialism and the development of Euro-American cultural identity.

Christopher Columbus's Naming in the 'diarios' of the Four Voyages (1492-1504) Evelina Guzauskyte, 2014-04-30 In this fascinating book, Evelina Guzauskyte uses the names Columbus gave to places in the Caribbean Basin as a way to examine the complex encounter between Europeans and the native inhabitants. Guzauskyte challenges the common notion that Columbus's acts of naming were merely an imperial attempt to impose his will on the terrain. Instead, she argues that they were the result of the collisions between several distinct worlds, including the real and mythical geography of the Old World, Portuguese and Catalan naming traditions, and the knowledge and mapping practices of the Taino inhabitants of the Caribbean. Rather than reflecting the Spanish desire for an orderly empire, Columbus's collection of place names was fractured and fragmented, the product of the explorer's dynamic relationship with the inhabitants, nature, and geography of the Caribbean Basin. To complement Guzauskyte's argument, the book also features the first comprehensive list of the more than two hundred Columbian place names that are documented in his diaries and other contemporary sources.
