SENSORY HAIR CELL DEATH AND REGENERATION, 2nd Edition Michael E. Smith,Andrew K. Groves,Allison B. Coffin,2025-01-23 Sensory hair cells are the mechanosensory receptors of the auditory and vestibular systems in all vertebrates and of the lateral line system of some aquatic vertebrates

Hair cells can be damaged and lost due to such factors as aging ototoxic chemicals acoustic trauma infection or genetic factors Loss of these hair cells lead to deficits in hearing and balance and in mammals such deficits are permanent In contrast non mammalian vertebrates exhibit the capability to regenerate missing hair cells Researchers have been examining the process of hair cell death and regeneration in animal models in an attempt to find ways of either preventing hair cell loss or stimulating the production of new hair cells in mammals with the ultimate goal of finding new therapeutics for human sensorineural hearing and balance deficits This has led to a wide array of research on hair cells such as understanding the factors that cause hair cell loss and finding agents that protect them from damage elucidating the apoptotic pathways activated during hair cell death examining the genes and cellular pathways that are regulated during the process of hair cell death and regeneration and characterizing the functional sensory loss and recovery following hair cell death and regeneration This research has involved cell and developmental biologists physiologists geneticists bioinformaticians and otolaryngologists In this Research Topic we wish to summarize and review recent progress of hair cell regeneration research and collate original articles advancing sensory hair cell death and regeneration research into the future

Simulating Conversations for the Prediction of Speech Quality Thilo Michael, 2023-06-30 This book discusses the simulation of conversations through a novel approach of predicting speech quality based on the interactions of two simulated interlocutors The author describes the setup of a simulation environment that is capable of simulating human dialogue on the speech level The impact of delay and bursty packet loss on VoIP conversations is investigated and modeled for the use in the simulation Based on parameters extracted from simulated conversations the author proposes extensions to the E model a parametric model standardized by the International Telecommunications Union in order to predict the quality of the simulated conversations The author shows that predictions based on the simulated conversations outperform models that rely on the transmission parameters alone

Power Vacuum Tubes Handbook Jerry C. Whitaker, 2013-04-17 The phrase high technology is perhaps one of the more overused descriptions in our technical vocabulary It is a phrase generally reserved for discussion of integrated circuits fiber optics satellite systems and computers Few people would associate high technology with vacuum tubes The notion that vacuum tube construction is more art than science may have been true 10 or 20 years ago but today it s a different story The demand on the part of industry for tubes capable of higher operating power and frequency and the economic necessity for tubes that provide greater efficiency and reliability have moved power tube manufacturers into the high tech arena Advancements in tube design and construction have given end users new transmit ters and RF generators that allow industry to grow and prosper If you bring up the subject of vacuum tubes to someone who has never worked on a transmitter you are likely to get a blank stare and a question Do they make those anymore Although receiving tubes have disappeared from the scene power tubes are alive and well and are performing vital functions in thousands of divergent applications Solid state and tube technologies each have their place each with its strengths and weaknesses Tube

design and development although accompanied by less fanfare is advancing as are developments in solid state technology Power tubes today are designed with an eye toward high operating efficiency and high gain bandwidth properties
