[The Lost Civilization Enigma](#) Philip Coppens, 2012-10-22 An examination of archaeological controversies with arguments showing evidence of prehistoric civilizations not recorded as part of human history Are history books giving us the whole story Or is civilization far more complex and older than we have been taught Our school textbooks barely mention the 6 000 year old Sumerian civilization yet the latest archaeological findings at sites such as Jericho and most recently Gobekli Tepe in Turkey have been dated to 10 000 BC Civilization goes back at least another 10 000 years if we are willing to believe what our ancestors themselves claimed The Lost Civilization Enigma reveals the truth about Lost magnitudes to known cultures such as the Bosnian Pyramids and the civilization of Old Europe The fabled lost golden cities of South America and the Amazon which are slowly being rediscovered Fascinating examples of lost technology such as the Antikythera Device Atlantis and the fact that it was a real civilization Analyzing the historical and archaeological record best selling author Philip Coppens demonstrates that there is substantial evidence that civilization is far older far more advanced and far more special than is currently accepted Clearly our history books have left out a great deal

A Secret History of Consciousness Gary Lachman, 2003-07 For the last four centuries science has tried to account for everything in terms of atoms and molecules and the physical laws they adhere to Recently this effort was extended to try to include the inner world of human beings Gary Lachman argues that this view of consciousness is misguided and unfounded He points to another approach to the study and exploration of consciousness that erupted into public awareness in the late 1800s In this secret history of consciousness consciousness is seen not as a result of neurons and molecules but as responsible for them meaning is not imported from the outer world but rather creates it In this view consciousness is a living evolving presence whose development can be traced through different historical periods and which evolves along a path to a broader more expansive state What that consciousness may be like and how it may be achieved is a major concern of this book Lachman concentrates on the period since the late 1800s when Madame Blavatsky first brought the secret history out into the open As this history unfolds we encounter the ideas of many modern thinkers from esotericists like P D Ouspensky Rudolf Steiner and Colin Wilson to more mainstream philosophers like Henri Bergson William James Owen Barfield and the psychologist Andreas Mavromatis Two little known but important thinkers play a major role in his synthesis Jurij Moskvitin who showed how our consciousness relates to the mechanisms of perception and to the external world and Jean Gebser who presented perhaps the most impressive case for the evolution of consciousness An important contribution to the study of consciousness a must read

Rene Noorbergen,2001 An increasing number of historical and archaeological finds made around the world have been classified as out of place artifacts ooparts They have been called this because they appear unexpectedly among the ruins of the past with no evidence of a preceding period of development their technological sophistication seems far beyond the capabilities of ancient peoples Drawing on the literature and art of the Chaldeans Sumerians Babylonians and others Rene Noorbergen s contention is that a superior race of man was responsible for these scientific marvels that bear testimony to a civilization with technology comparable to our own Ancient Civilizations George Shelley Hughs,1896
