Lost Millennium:

The Lost Millennium Florin Diacu, 2010-07-23 Have you ever wondered how we really know what year it is Part detective story part conspiracy theory part scientific history The Lost Millennium explores the astonishing possibility that our calendar is out by a thousand years A chance conversation at a conference in Mexico started mathematician Florin Diacu on an amazing journey to make sense of one of the strangest and if true most revolutionary theories you ll ever encounter To understand how scientists could be sceptical about what year it is Florin Diacu explores the fascinating history of chronology from Egyptian horoscopes to the work of Isaac Newton with cameos by Voltaire and Edmund Halley making the startling discovery that our calendar is far from ironclad It all depends rather on the dating of ancient events about which there is real controversy At once accessible and profound The Lost Millennium examines the arguments of present day chronological revisionists such as the Russian scholar Anatoli Fomenko who claims that our system of dating is horribly askew Fomenko cites evidence from ancient astronomy linguistics and cartography and a crucial manuscript by Ptolemy staking his scientific prestige on a theory so controversial that it will change the way you think about time history and the calendar on your wall The field has also inspired its share of now discredited cranks such as Immanuel Velikovsky a media celebrity of the 1950s His notorious book *Worlds in Collision* argued that biblical events are incorrectly dated Beautifully written and peopled with fascinating characters from past and present The Lost Millennium is essential reading for anyone who believes they re living in the year 2005

Maps of the Ancient Sea Kings Charles H. Hapgood, 1966 Hapgood utilizes ancient maps as concrete evidence of an advanced worldwide civilization existing many thousands of years before ancient Egypt Hapgood concluded that these ancient mapmakers were in some ways much more advanced in mapmaking than any people prior to the 18th century Hapgood believes that they mapped all the continents This would mean that the Americas were mapped thousands of years before Columbus Antarctica would have been mapped when its coasts were free of ice Hapgood supposes that there is evidence that these people must have lived when the Ice Age had not yet ended in the Northern Hemisphere and when Alaska was still connected with Siberia by the Pleistocene Ice Age land bridge

C. Philipp E. Nothaft, 2011-10-06 The beginnings of scientific chronology are usually associated with the work of the great Renaissance philologist Joseph Scaliger 1540 1609 but this perspective is challenged by the existence of a vivid pre modern computistical tradition in which technical chronological questions especially regarding the life of Jesus played an essential role Christian scholars such as Roger Bacon made innovative breakthroughs in the field of historical dating by applying astronomical calculations critical exegesis and the study of the Jewish calendar to chronological problems Drawing on a wide selection of sources that range from late antiquity to 1600 this book uses the history of the date of Christ s Passion to shed new light on the medieval contribution to science and scholarship Monarch: The New Phoenix Program Marshall Thomas,

particular type of cataclysmic event and the research surrounding it including earthquakes tsunamis volcanic eruptions hurricanes rapid climate change collisions with asteroids or comets pandemics and financial crashes Florin Diacu tells the harrowing true stories of people impacted by these terrible events and of the scientists racing against time to predict when the next big disaster will strike He describes the mathematical models that are so critical to understanding the laws of nature and foretelling potentially lethal phenomena the history of modeling and its prospects for success in the future and the enormous challenges to scientific prediction posed by the chaos phenomenon which is the high instability that underlies many processes around us Yielding new insights into the perils that can touch every one of us Megadisasters shows how the science of predicting disasters holds the promise of a safer and brighter tomorrow Mercy Among the Children David Adams Richards, 2011-07-27 Mercy Among the Children received effusive praise from the critics was nominated for a Governor General's Award and won the Giller Prize It was named one of 2000's best books became a national bestseller in hardcover for months and would be published in the US and UK It is seen however as being at odds with literary fashion for concerning itself with good and evil and the human freedom to choose between them an approach that puts Richards as Maclean's magazine says firmly in the tradition of Tolstoy and Dostoevsky Author Wayne Johnston recounts hearing Richards read in 1983 and being struck by his unqualified love for every one of his characters even though it was not then fashionable to love your characters Pottersfield Portfolio editor Tony Tremblay calls Richards the most misunderstood Canadian writer of the century and a great moralist comparing him to Morley Callaghan Kafka and Melville As a boy Sydney Henderson thinks he has killed Connie Devlin when he pushes him from a roof for stealing his sandwich He vows to God he will never again harm another if Connie survives Connie walks away laughing and Sydney embarks upon a life of self-immolating goodness In spite of having educated himself with such classics as Tolstoy and Marcus Aurelius he is not taken seriously enough to enter university because of his background of dire poverty and abuse which leads everyone to expect the worst of him His saintly generosity of spirit is treated with suspicion and contempt especially when he manages to win the love of beautiful Elly Unwilling to harm another in thought or deed or to defend himself against false accusations he is exploited and tormented by others in this rural community and finally implicated in the death of a 19-year-old boy Lyle Henderson knows his father is innocent but is angry that the family has been ridiculed for years and that his mother and sister suffer for it He feels betrayed by his father's passivity in the face of one blow after another and unable to accept his belief in long-term salvation Unlike his father he cannot believe that evil will be punished in the end While his father turns the other cheek Lyle decides the right way is in fighting and embarks on a morally empty life of stealing drinking and violence A compassionate powerful story of humanity confronting inhumanity it is a culmination of Richards' last seven books beginning with Road to the Stilt House It takes place in New Brunswick's Miramichi Valley like all of his novels so far which has led some urban critics to misjudge his work as regional a criticism leveled at Thomas Hardy Joseph Conrad and Emily Brontë in their own day Like his literary

heroes Richards aims to evoke universal human struggles through his depiction of the events of a small rural place where one person's actions impact inevitably on others in a tragic web of interconnectedness. The setting is extremely important in Richards' work because the characters come from the soil but as British Columbia author Jack Hodgins once told Richards, "every character you talk about is a character I've met here in Campbell River." *Anthology of Magazine Verse for ... and Year Book of American Poetry*, 1929. *The Politics of Eurasianism* Mark Bassin, Gonzalo Pozo, 2017-01-12. In the course of Vladimir Putin's third presidential term, many of the doctrines and ideas associated with Eurasianism have moved to the center of public political discourses in Russia. Eurasianism, both Russian and non-Russian, is politically active, influential, and contested in debates about identity, popular culture, or foreign policy narratives. Deploying a variety of theoretical frameworks and perspectives, the essays in this volume work together to shed light on both Eurasianism's plasticity and contemporary weight and examine how its tropes and discourses are appropriated, interpreted, modulated, and deployed politically by national groups, oppositional forces, left or right, prominent intellectuals, artists, and last but not least, government elites. In doing so, this collection addresses essential themes and questions currently shaping the Post-Soviet world and beyond.
