Fast Facts Addition and Subtraction EBooks Heather McDonald, Joan Westley, 2010-02. *Maths is all Around You* Marianne Knaus, 2015-04-23. We encounter mathematics on a regular basis in one form or another. For some people maths is scary and not something they feel confident about. Even though many educators and parents attempt to provide good mathematics experiences there is still a high level of anxiety about the teaching and learning of mathematics. This book presents a broad range of concepts and aims to widen the narrow view that maths for young children is just about numbers and shapes. The content includes pattern, early algebra, counting, number, early operations, measurement, shape and spatial awareness, geometry, matching, sorting, data analysis and the introduction of chance, statistics and probability. This book is intended for educators and parents who would like to explore and investigate maths concepts to enrich children's experiences and extend their current thinking and learning. *Handbook of Special Education* James M. Kauffman, Daniel P. Hallahan, Paige Cullen Pullen, 2017-05-25. The purpose of the Handbook of Special Education is to help profile and bring greater clarity to the already sprawling and continuously expanding field of special education. To ensure consistency across the volume, chapter authors review and integrate existing research, identify strengths and weaknesses, note gaps in the literature and discuss implications for practice and future research. The second edition has been fully updated throughout to take into account recent changes to federal laws as well as the most current academic research and an entirely new section has been added on research methods in special education.
