*Strengthening women's empowerment, climate resilience, and nutrition along the goat value chain in Senegal: A qualitative study* Kane, Papa Abdoulaye, Barry, Mamadou Bobo, Eissler, Sarah, Tall, Thiané, Camara, Astou Diao, Sall, Moussa, Fass, Simone, Bryan, Elizabeth, Ringler, Claudia, 2024-10-02 Goats are an important source of income nutrition and resilience in Senegal This study assesses opportunities to strengthen women s agency increase resilience to climate change and improve nutrition along the various stages of goat value chains from the acquisition of feed resources and other inputs to processing marketing and consumption of various goat products The qualitative study finds that even though goats are more climate resilient than other livestock climate change impacts on goat production and productivity are increasingly felt particularly through impacts on feed resources The study identified opportunities to strengthen women s roles along the goat value chain particularly in goat production and to a lesser extent in processing of goat products Women and their families also benefit from the consumption of goat milk and women have some degree of control over income from the sale of goat products Strengthening women s agency in these nutrient rich and relatively climate resilient value chains will require improving their access to land resources and better animal feeds supporting women s groups and building women s capacity for processing and marketing goat products improving access to electricity for cold storage of goat products and raising awareness regarding the nutritional benefits of goat products especially for women and children **Sustainable Goat**

**Production in the Changing Climate** Veerasamy Sejian, M.V. Silpa, D. Thirunavukkarasu, 2025-06-01 Sustainable Goat Production in the Changing Climate aims to make the global scientific and academic communities aware of the potential of goats as a livestock of the future. When compared to more popular meat sources like cattle and swine, goats have a lower carbon footprint and can aid in mitigating the effects of climate change as well as improving food production, poverty, and equity issues. This book will discuss the implications of climate change on goat production systems and emphasize the physiological potential of goats to adapt to erratically changing climatic conditions. Furthermore, the book includes chapters on strategies to mitigate the effects of climate change on goat production and highlights novel technologies used to assess the impact of heat stress in goats. Technology transfer strategies and policy-related issues will also be covered. Written and edited by an international team of experts on goats, livestock, animal agriculture, and climate-smart food systems, Sustainable Goat Production in the Changing Climate will appeal to a broad audience from researchers to livestock specialists, veterinarians, and policymakers in food and sustainability. Explores the potential of goats as future livestock species for animal origin foods. Summarizes the impact of climate change on goats and goat production systems. Proposes technological interventions ranging from management to bio-technological solutions. Identifies gaps in technology transfer activities and policymaking and provides solutions.
