Health Status Measurement Crispin Jenkinson, Hannah M. McGee, 1998 This book introduces the terminology used in the growing field of subjective health status measurement as well as the issues to be considered when using this form of assessment Nutritional Status Assessment and its Links with Chronic Disease Prognosis and Surgical Outcomes Gabriela Villação Chaves, Barbara Perez Vogt, Geórgia das Graças Pena, Rodolfo Espinoza, 2024-11-06 Nutritional disorders are related to poor health outcomes including longer hospital stays postoperative complications cancer treatment toxicity shorter survival and reduced quality of life The use of nutritional assessment tools for both diagnostic and outcome measure purposes has been widely explored However understanding of their responsiveness to nutritional interventions is still in its incipient stages There has been increasing awareness of the importance of nutritional screening and assessment especially the integration of skeletal muscle mass evaluation into clinical practice In this context a standardized definition of low muscle mass myosteatosis and muscle strength is still under debate Since there is no clear definition of proper cut off points for each assessment tool the understanding and synthesis of the literature results are hindered Moreover the interplay among nutritional disorders has been under explored in literature research Efforts should be made to assess the association between comprehensive nutritional diagnosis and the prognosis of chronic diseases and surgical outcomes as most studies provide information on one feature of nutritional status and do not explore standardized nutritional assessment widely
