percent of all life on Earth the ocean is the world s largest carbon sink and a key source of food and economic security for
billions of people The relevance of the ocean for humanity s future is undisputed However the ocean s great potential to drive
economic growth and equitable job creation sustain healthy ecosystems and mitigate climate change is not yet fully
recognised Lack of awareness of this potential as well as management and governance challenges pose impediments Until
these impediments are removed ocean ecosystems will continue to be degraded and opportunities for people lost A transition
and a clear path to a thriving and vibrant relationship between humans and the ocean are urgently needed This open access
collection of papers and reports identifies a path that is inspired by science energised by engaged people and emboldened by
visionary leaders These assessments of knowledge are commissioned by the High Level Panel for a Sustainable Ocean
Economy Ocean Panel which was established in September 2018 as a unique initiative led by heads of state and government
from around the world to showcase the latest leading edge science knowledge and state of the art thinking on key ocean
issues Altogether The Blue Compendium offers innovative ocean solutions in technology policy governance and finance
realms that could help accelerate a transition to a more sustainable and prosperous relationship with the ocean The
comprehensive assessments have already informed policy making at the highest levels of government and motivated an
impressive array of responsive and ambitious action across a growing network of leaders in business finance and civil society
