all agrifood systems actors from producers and agribusinesses to consumers and governments have a crucial role to play. While transforming agrifood systems would yield a net global gain, the benefits and costs would be unevenly distributed among stakeholders and countries over time. The State of Food and Agriculture 2024 builds on the findings of the 2023 edition, delving deeper into the use of true cost accounting assessments of agrifood systems and identifying policy interventions aimed at transformation. Using updated global datasets, the report confirms previous estimates of the quantified hidden costs of agrifood systems and provides a detailed breakdown of the hidden costs associated with unhealthy dietary patterns and non-communicable diseases for 156 countries. These findings are analysed through the lens of six agrifood systems categories to take into account various outcomes and hidden costs that require different policy interventions. Case studies offering in-depth assessments of country local and value chain contexts illustrate the economic, social and environmental impacts of current practices to guide policy interventions. Crucial to all contexts is the need for inclusive stakeholder consultations to inform interventions and reconcile power imbalances and trade-offs.

Neuroscience - E-Book Laurie Lundy-Ekman, 2017-10-30. Boost your skills in planning and managing physical rehabilitation. *Neuroscience Fundamentals for Rehabilitation* 5th Edition provides a practical guide to the nervous system and how it affects the practice of physical and occupational therapy. Case studies and first person stories from people with neurologic disorders make it easier to apply your knowledge to the clinical setting. New to this edition are new chapters on neuroanatomy, imaging and neurologic examination techniques. Written by noted PT educator Laurie Lundy Ekman, this book uses evidence-based research to help you understand neurologic disorders and treat clients who have physical limitations due to nervous system damage or disease. Logical systems approach to neuroscience makes it easier to master complex information and provides a framework for conducting a neurologic examination and evaluation. A clinical perspective of neuroscience is provided through case studies, personal stories written by patients and summaries of key features of neurologic disorders and the body systems they affect. Five sections: Overview of Neurology, Neuroscience at the Cellular Level, Development of the Nervous System, Vertical Systems and Regions, first show how neural cells operate and then allow you to apply your knowledge of neuroscience. Emphasis on topics critical to physical rehabilitation includes coverage of abnormal muscle tone, chronic pain, control of movement and differential diagnosis of dizziness. Hundreds of color-coded illustrations show body structures and functions across systems. Clinical Notes case studies demonstrate how neuroscience knowledge may be applied to clinical situations. Pathology boxes provide a quick summary of the features of neurologic disorders commonly encountered in rehabilitation practice. New Neuroimaging and Neuroanatomy Atlas chapter includes MRI and CT images. NEW Neurologic Disorders and the Neurologic Examination chapter provides detailed descriptions and photographs of techniques. NEW

Diagnostic Clinical Reasoning boxes help you develop the ability to recognize patterns of signs and symptoms associated with specific diagnoses NEW Updated content reflects the most current research findings NEW Reader friendly approach converts long technical chapters into smaller more accessible chapters NEW Reorganized chapters progress from the cellular view to the systems view to the regional view **An Introduction to the Study of the Nervous System** E. E. Hewer,G. M.

Sandes,2013-10-22 An Introduction to the Study of the Nervous System covers topics about the minute structure and functions of the nervous system The book discusses the minute and gross anatomy of the various parts of the nervous system the degenerative and regenerative changes following section of the nerves and the descending and ascending tracts of the spinal cord The text then describes the cerebellar connections the deep connections of the cranial nerves and the microscopic structure of the cortex of the cerebellum and of the cerebrum The distribution source circulation and absorption pressure and normal composition of the cerebrospinal fluid and the parts and functions of the autonomic nervous system are also considered The book further tackles the normal physiology of the sensory and motor paths the results of interference with the general sensory path at various levels and the visual path and interference therewith The text also discusses the cochlear and olfactory paths and the interference therewith and the levels of integration and mechanism of coordinated muscular movement Students taking courses related to neurology will find the book useful
