Operationism in Psychology Uljana Feest, 2025-03-11 Analyzes psychological research to offer insights into how methodological and ontological questions are intertwined Psychology has seen an intense debate about the lack of replicability of results in recent years Uljana Feest uses history and philosophy of science to shed light on the nature of experiment in psychology in general but her aim reaches beyond debates about replication to provide a novel and comprehensive analysis of the investigative process in experimental psychology She shows that the central unit of analysis for our epistemological considerations of psychological research should be not theories but rather concepts Her guiding question is How do psychological concepts figure in the experimental exploration of the objects of psychological research For Feest this question has two intertwined aspects What role do concepts play in the design of experiments and the production of data and how can concepts be revised or adapted in response to experimental results Following the historical trajectory of debates about operationism in psychology she argues that this debate was not concerned with philosophical theories of meaning but instead closely connected to the investigative practices of experimental psychologists The book offers a broad analytical framework for thinking philosophically about the investigative process in psychology including analyses of the relationship between data and phenomena in psychology the relationship between folk and scientific psychological concepts the relationship between genuine results and experimental artifacts and the nature and exploration of psychological kinds

Crossing into Manhood: A Men's Studies Curriculum Christopher P. Mason, 2006 Many scholars have documented and decried the crisis in American masculinity There is a preponderance of evidence showing that males suffer from many physical emotional and social ills due to the gender scripts with which they were raised and which continue to govern men's lives Throughout the millennia and across cultures initiation rites of passage have been utilized as an effective means of transitioning young males into manhood Modern culture suffers from a dearth of rites of passage leaving many boys stuck in puerile attitudes and behaviors and unable to make a wholesome transition into mature masculinity Crossing into Manhood is a much needed guide on assisting late adolescent boys transition into manhood it proposes a school based curriculum and rite of passage paradigm to help young men make the difficult passage into manhood Utilizing resources from diverse academic disciplines this book surveys the psychoanalytic the social constructionist and the essentialist perspectives on masculine gender As a result a men's studies curriculum has been formulated one that offers a balanced bio psycho social conceptualization of masculine identity Educators will find the contents of this book helpful in providing the key conceptual information necessary to teach a men's studies course to late adolescent boys This book will provoke further dialogue and work among educators and other adults in this important area

The Myth of Empowerment Dana Becker, 2005-02-01 The Myth of Empowerment surveys the ways in which women have been represented and influenced by the rapidly growing therapeutic culture both popular and professional from the mid nineteenth century to the present The middle class woman concerned about her health and her ability to care for others in an uncertain world is not as different from her late nineteenth century white middle class predecessors as we might imagine In the nineteenth century she was told that her moral virtue was her power today her power is said to reside in her ability to relate to others or to take better care of herself so that she can take care of others Dana Becker argues that ideas like empowerment perpetuate the myth that many of the problems women have are medical rather than societal personal rather than political From mesmerism to psychotherapy to the Oprah Winfrey Show women have gleaned ideas about who they are as psychological beings Becker questions what women have had to gain from these ideas as she recounts the story of where they have been led and where the therapeutic culture is taking them
