Psychology Adaptive Mind:

The Adapted Mind Jerome H. Barkow, Leda Cosmides, John Tooby, 1995-10-19 Although researchers have long been aware that the species typical architecture of the human mind is the product of our evolutionary history it has only been in the last three decades that advances in such fields as evolutionary biology cognitive psychology and paleoanthropology have made the fact of our evolution illuminating Converging findings from a variety of disciplines are leading to the emergence of a fundamentally new view of the human mind and with it a new framework for the behavioral and social sciences First with the advent of the cognitive revolution human nature can finally be defined precisely as the set of universal species typical information processing programs that operate beneath the surface of expressed cultural variability Second this collection of cognitive programs evolved in the Pleistocene to solve the adaptive problems regularly faced by our hunter gatherer ancestors problems such as mate selection language acquisition cooperation and sexual infidelity Consequently the traditional view of the mind as a general purpose computer tabula rasa or passive recipient of culture is being replaced by the view that the mind resembles an intricate network of functionally specialized computers each of which imposes contentful structure on human mental organization and culture The Adapted Mind explores this new approach evolutionary psychology and its implications for a new view of culture

Psychology James S. Nairne, 2000 James Nairne's highly respected and accessible new edition offers all the content pedagogy and visual appeal that professors and students have come to expect from a successful introductory psychology text and more Nairne's Second Edition offers a cohesive look at how psychology works in our everyday lives This practical motivating text presents all the topics you cover in your introductory course but connects them in a way that adds meaning and consistency to your students study of the discipline And how does it do this By introducing students to the adaptive mind a theme based on the realization that our thoughts and actions stem from our need to adapt to our surroundings This unique framework stresses practical applications and helps students understand how we use psychology to deal with everyday challenges Nairne builds all topics around an adaptive problem solving framework He emphasizes the way that particular behaviors though processes and emotions help people solve problems from memorizing a telephone number to ducking under cover as a building begins to shake to producing a quick physical response in the face of traffic hazards This organizational framework also promotes a common theme of understanding across the chapters This innovative approach may differ from the presentation you have come to expect from others texts But beneath the innovation you'll find ample coverage of all the traditional topics around which you build your course
