Name_____

Current Date_____

Advisor_____ Entering year_____ Expected Graduation_____

Purpose & Procedure

The purpose of this review is twofold. The first purpose is to give you an opportunity to reflect on your professional progress toward the Ph.D. degree during the most recent academic year. An important part of this process is the chance to have an extended conversation with your advisor about accomplishments and future plans. Second, you have an opportunity to provide your advisor, guidance committee and the program faculty with accurate information in order for them to fairly evaluate your progress in the program.

There are multiple stages in the review:

- 1) First, complete this form and submit it with attachments **no later than April 22, 2013**. To submit, go to the Angel group *EPET PhD Students and Faculty (Educational Psychology and Educational Technology)*, then to the folder *2012 Student Annual Progress Review*. There you will find a drop box to submit your annual review materials.
- 2) Second, if you have questions about any aspects of the review, schedule a meeting with your advisor to talk about the topics and issues addressed on the form prior to **May 1, 2013**. The program faculty will be meeting to discuss students' progress shortly thereafter.
- 3) Based upon the information you have provided, along with a transcript of your course performances, the program faculty will meet to discuss your academic progress.
- 4) Two outcomes are possible from this review, satisfactory progress and unsatisfactory progress. Students will be informed of this outcome in a written letter. In the case of unsatisfactory progress, the letter to students' will include an action plan with the steps needed to regain satisfactory progress in the program.
- 5) Please note, students deemed to be making unsatisfactory progress for two consecutive reviews will be dismissed from the program.
- 6) You will receive a letter summarizing the faculty discussion and our overall evaluation of your progress by **May 31, 2013**.

The program will maintain a copy of each annual review in the student's official folder for use in cases of nomination for fellowships, documentation for students' progress, and for the student's own review for purposes of assembling or updating a vita.

The Psychology Major's Handbook , **Creating Self-Regulated Learners**

Linda B. Nilson,2023-07-03 Most of our students neither know how learning works nor what they have to do to ensure it to the detriment both of their studies and their development as lifelong learners The point of departure for this book is the literature on self regulated learning that tells us that deep lasting independent learning requires learners to bring into play a range of cognitive skills affective attitudes and even physical activities about which most students are wholly unaware and that self regulation which has little to do with measured intelligence can be developed by just about anyone and is a fundamental prerequisite of academic success Linda Nilson provides the theoretical background to student self regulation the evidence that it enhances achievement and the strategies to help students develop it She presents an array of tested activities and assignments through which students can progressively reflect on monitor and improve their learning skills describes how they can be integrated with different course components and on various schedules and elucidates how to intentionally and seamlessly incorporate them into course design to effectively meet disciplinary and student development objectives Recognizing that most faculty are unfamiliar with these strategies she also recommends how to prepare for introducing them into the classroom and adding more as instructors become more confident using them The book concludes with descriptions of courses from different fields to offer models and ideas for implementation At a time of so much concern about what our students are learning in college and how well prepared they are for the challenges of tomorrow s economy and society self regulated learning provides a reassuring solution particularly as studies indicate that struggling students benefit the most from practicing it

Step by step they explore all aspects of pedagogy from how to make learning compelling and challenging to how best to make use of the environment for learning from how to coach students so that they become more independent and responsible directors of their own learning to subtle shifts in teacher language and behaviour that change the climate for learning.
