To Want to Learn Jackson Kytle, 2012-07-17 Lack of learner motivation is the single greatest challenge before American schools and colleges When students are self motivated they invest more and work harder at learning even if resources are inadequate Jackson Kytle's provocative book argues that students and teachers waste time and human energy because the conventional curriculum rests on flawed mental models Hope for change requires a searching critique of modernity as well as expanded theories of human motivation and learning based on advances in neurobiology and cognitive studies After consideration of existentialism and choice of life purposes and the dynamics of psychological involvement Kytle closes his ambitious interdisciplinary book with ten considerations for better learning

Middle Grades Curriculum Kathleen Roney, Richard P. Lipka, 2013-05-01 High stakes testing standards and accountability politics is taking us away from the importance of the affective domain in curriculum development This critical learning domain is often an unrecognized and infrequently considered topic in the literature Through this book we extend the current knowledge base by addressing a curriculum model developed in the 1980s We add a 2012 knowledge base as we delineate the role of self perceptions in school related learning how middle level curriculum affects self perceptions and the type of curriculum planning which enhances self perceptions and improves learning in the cognitive affective and psychomotor domains The combination of sound psychological principles and practical teaching and curriculum suggestions with an empirical basis makes the book attractive to both higher education and local school professional libraries In the

former it will serve as the primary text in graduate and advanced undergraduate middle level education programs and practices courses It might also be a primary text in courses or workshops in affective education or other experiences which emphasize affective values and self concept It also has potential as a supplementary text in undergraduate educational psychology courses At the in service level this book could be used as a workshop resource or as a professional reference for middle level teachers administrators curriculum workers and supervisors Our interest in young adolescents and their school setting coincides with the fourth edition of This We Believe NMSA 2010 The self enhancing school is characterized by from to statements for example from avoiding parents to working with parents Using theory and research we discuss the costs of staying in the from position and the benefits derived from moving to the to position By combining educational psychology and curriculum development we make a unique contribution to middle grades curriculum developers **Conducting**

Paradigm Debates in Curriculum and Supervision Linda Behar-Horenstein, Jeffrey Glanz, 2000-01-30 Paradigm debates in the educational research community are a frequent if not common occurrence How do paradigm debates in other educational fields such as curriculum and supervision shape educators understanding and practice In this volume it is suggested that educators adherence to particular views of curriculum and supervision is influential in guiding their beliefs and subsequent actions For example a widely accepted belief is that if an individual adopts a mechanistic view of the curriculum then s he is likely to deliver a curriculum grounded in pre established objectives and evaluate student achievement in relationship to formulated objectives Postmodernists contend that such educators are bound by rigid bifurcation and a constrictive linear logic In supervision educational leaders who favor leadership styles comprised by autocratic behaviors tend to create school climates that favor a top down approach to human relationships Autocratic leaders rely on hierarchical organizational structures and styles that seek to instill compliance and subordination Yet prospective administrators who want concrete proposals put in practice find modern perspectives of supervision helpful In contrast postmodern supervisors allege that such leaders disallow the emergence of relevant and authentic relationships that might occur when conventional hierarchical structures are diminished and open lines of communication between teachers students administrators become normative The chapters in this book present an in depth analysis of how an individual s predisposition towards modern and postmodern views of curriculum and supervision are likely to influence 1 curriculum development 2 teaching styles 3 leadership styles 4 teacher and student evaluation and 5 the missions intrinsic to the creation of professional preparation programs that serve to promulgate existing practice or create a new order of teachers and administrator

Community Organizing for Urban School Reform Dennis Shirley, 2010-01-01 Observers of all political persuasions agree that our urban schools are in a state of crisis Yet most efforts at school reform treat schools as isolated institutions disconnected from the communities in which they are embedded and insulated from the political realities which surround them Community Organizing for Urban School Reform tells the story of a radically different approach to

educational change Using a case study approach Dennis Shirley describes how working class parents public school teachers clergy social workers business partners and a host of other engaged citizens have worked to improve education in inner city schools Their combined efforts are linked through the community organizations of the Industrial Areas Foundation which have developed a network of over seventy Alliance Schools in poor and working class neighborhoods throughout Texas This deeply democratic struggle for school reform contains important lessons for all of the nation s urban areas It provides a striking point of contrast to orthodox models of change and places the political empowerment of low income parents at the heart of genuine school improvement and civic renewal

Public Policy and Community Robert H. Wilson, 2010-07-22 The decentralization of public policy from the federal government to state and local governments offers increased opportunities for ordinary citizens to participate directly in public policymaking Yet these opportunities may not be equally shared Due to a variety of factors low income citizens have long been denied a meaningful role in the public life and governance of our country By contrast the essays in this volume explore how low income citizens have successfully affected public policy The book is built around six case studies all from Texas that cover education finance and reform local infrastructure provision environmental protection and indigent health care This research illuminates several issues of national importance including how communities gain standing and recognition for themselves and their issues how policy agendas are defined how communities mobilize technical and institutional resources and how they form coalitions and alliances to accomplish their goals **Georgia State University Law Review** ,1995 *Globalization and Living Together* D.B.
