Radical Space Building The House Of The People:

Radical Space Margaret Kohn, 2003 Epoch making political events are often remembered for their spatial markers the fall of the Berlin Wall the storming of the Bastille the occupation of Tiananmen Square Until recently however political theory has overlooked the power of place In *Radical Space* Margaret Kohn puts space at the center of democratic theory Kohn examines different sites of working class mobilization in Europe and explains how these sites destabilized the existing patterns of social life economic activity and political participation Her approach suggests new ways to understand the popular public sphere of the early twentieth century This book imaginatively integrates a range of sources including critical theory social history and spatial analysis Drawing on the historical record of cooperatives houses of the people and chambers of labor Kohn shows how the built environment shaped people's actions identities and political behavior She illustrates how the symbolic and social dimensions of these places were mobilized as resources for resisting oppressive political relations The author shows that while many such sites of resistance were destroyed under fascism they created geographies of popular power that endure to the present

Cosmopolitanism and the Geographies of Freedom David Harvey, 2009-08-22 Liberty and freedom are frequently invoked to justify political action Presidents as diverse as Woodrow Wilson Franklin Delano Roosevelt John F Kennedy Ronald Reagan and George W Bush have built their policies on some version of these noble values Yet in practice idealist agendas often turn sour as they confront specific circumstances on the ground Demonstrated by incidents at Abu Ghraib and Guantanamo Bay the pursuit of liberty and freedom can lead to violence and repression undermining our trust in universal theories of liberalism neoliberalism and cosmopolitanism Combining his passions for politics and geography David Harvey charts a cosmopolitan order more appropriate to an emancipatory form of global governance Political agendas tend to fail he argues because they ignore the complexities of geography Incorporating geographical knowledge into the formation of social and political policy is therefore a necessary condition for genuine democracy Harvey begins with an insightful critique of the political uses of freedom and liberty especially during the George W Bush administration Then through an ontological investigation into geography's foundational concepts space place and environment he radically reframes geographical knowledge as a basis for social theory and political action As Harvey makes clear the cosmopolitanism that emerges is rooted in human experience rather than illusory ideals and brings us closer to achieving the liberation we seek

The Church, Authority, and Foucault Steven G. Ogden, 2017-02-03 *The Church Authority and Foucault* addresses the problem of the Church's enmeshment with sovereign power which can lead to marginalization Breaking new ground Ogden uses Foucault's approach to power and knowledge to interpret the church leader's significance as the guardian of knowledge This can become privileged knowledge under the spell of sovereign power and with the complicity of clergy and laity in search of

sovereigns Inevitably such a culture leads to a sense of entitlement for leaders and conformity for followers All in the name of obedience The Church needs to change in order to fulfil its vocation Instead of a monarchy what about Church as an open space of freedom This book then is a theological enterprise which cultivates practices of freedom for the sake of the other This involves thinking differently by exploring catalysts for change which include critique space imagination and wisdom In the process Ogden uses a range of sources analysing discourse gossip ritual territory masculinity and pastoral power In all the work of Michel Foucault sets the tone for a fresh ecclesiological critique that will appeal to theologians and clergy alike
