Radio Programming:

Radio Programming: Tactics and Strategy Eric Norberg, 1996-05-07 A practical handbook for programming directors this guide focuses on achieving specific objectives in today's modern competitive environment Radio Programming is designed to convey underlying principles and to assist the programmer in accomplishing specific objectives without mandating exact implementation methods Instead it empowers station management and the PD to implement strategies that will work for the particular format and market niche Radio Programming will be helpful for neophytes in programming experienced programmers seeking further growth air talent seeking to develop skills and general managers trying to understand programming and effectively manage program directors without stifling creativity It will also help general managers hire effective programmers Eric Norberg is the editor and publisher of the Adult Contemporary Music Research Letter and a radio consultant He has worked as a program director at several radio stations as on air talent and general manager and has also operated a radio production company For fourteen years he has written a weekly column on radio programming for The Gavin Report a radio trade publication *Programming for Radio and Television* Jackson V. Smith, 1983 *This Business of Radio Programming* Claude Hall, Barbara Hall, 1977 **Programming for TV, Radio & The Internet** Lynne Gross, Brian Gross, Philippe Perebinosoff, 2012-11-12 Where do program ideas come from How are concepts developed into saleable productions Who do you talk to about getting a show produced How do you schedule shows on the lineup What do you do if a series is in trouble The answers to these questions and many more can be found in this comprehensive in depth look at the roles and responsibilities of the electronic media programmer Topics include Network relationships with affiliates the expanded market of syndication sources of programming for stations and networks research and its role in programming decisions fundamental appeals to an audience and what qualities are tied to success outside forces that influence programming strategies for launching new programs or saving old ones Includes real life examples taken from the authors experiences and 250 illustrations Future Radio Programming Strategies David MacFarland, 2013-10-18 Fundamental beliefs is what the reader will be exploring here a common understanding of what the radio enterprise should be about entertainment and information A major thrust of this book is to arrive at a set of fundamental beliefs about the values and realities of the radio business in regard to entertainment programming a set of beliefs that may or may not be right true or forever but that might at least provide a basis for developing programming strategies This second edition of Future Radio Programming Strategies seeks to answer the question What do listeners really want from radio Some of the answers are derived from users and gratifications research in the mass media Instead of focusing on what mass media do to people the users and gratifications perspective seeks to discover what people do with mass media The functionalist viewpoint of such research basically says that a medium is best defined by how people use it Having looked at some of the audience research that comes from sources other than the standard ratings companies the book then goes on to demonstrate new ways that

formats production procedures and announcing styles can meet audience needs and desires Although the volume concludes with several original methods for selecting and presenting airplay music based on the audience s moods and emotional needs it does not insist upon a singular formulaic approach for constructing or modifying a music format Instead it attempts to involve the reader in thinking through the process of format development Two audio tapes are also available for use with the book The tapes contain nearly 3 hours of important detailed information and provocative points from the book Exclusive audio examples include the sense of acoustic space in music hi fi versus lo fi listening environments subjective perception of the announcer s distance from the listener audio editing rates comparison of luxury versus inexpensive car listening experiences and the components of emotions that are expressed vocally The tapes also include new sections about the threats to traditional radio from specialized digital audio services competition for the listener s attention from computer based media and additional proof of how music can be chosen on the basis of listeners emotional reactions and mood needs
