Radio carbon: Calibration and Prehistory

Edited by
Trevor Watkins

The technical complexities of C-14 dating can baffle archaeologists.

This book attempts their rescue. It is by specialists for non-specialists.

The realisation that the production rate of C-14 in the atmosphere was not constant undermined the assumption that C-14 years could be equated with calendar years.

Correction by calibration with cross-dated tree-ring radio-carbon samples offers hope, but creates 'correction curves' of bewildering variety.

This book explains the issues clearly and simply, provides valuable comparative data, assesses the reliability of the methods, tells how to take a sample, and where to send it for dating.

new research author Michael Chazan shows that archaeology is truly a global discipline In this edition there is a particular emphasis on the relevance of archaeology to contemporary society and to the major issues that face us today This edition will provide students with a necessary grounding in the fundamentals of archaeology before engaging them with the work that goes into understanding world prehistory They will be given the tools to place this knowledge in the context of the modern world acknowledging the relevance of archaeology to the concerns of today

Prehistoric Britain Timothy Darvill, 2010-07-02 Britain has been inhabited by humans for over half a million years during which time there were a great many changes in lifestyles and in the surrounding landscape This book now in its second edition examines the development of human societies in Britain from earliest times to the Roman conquest of AD 43 as revealed by archaeological evidence Special attention is given to six themes which are traced through prehistory subsistence technology ritual trade society and population Prehistoric Britain begins by introducing the background to prehistoric studies in Britain presenting it in terms of the development of interest in the subject and the changes wrought by new techniques such as radiocarbon dating and new theories such as the emphasis on social archaeology The central sections trace the development of society from the hunter gatherer groups of the last Ice Age through the adoption of farming the introduction of metalworking and on to the rise of highly organized societies living on the fringes of the mighty Roman Empire in the 1st century AD Throughout emphasis is given to documenting and explaining changes within these prehistoric communities and to exploring the regional variations found in Britain In this way the wealth of evidence that can be seen in the countryside and in our museums is placed firmly in its proper context It concludes with a review of the effects of prehistoric communities on life today With over 120 illustrations this is a unique review of Britain's ancient past as revealed by modern archaeology The revisions and updates to Prehistoric Britain ensure that this will continue to be the most comprehensive and authoritative account of British prehistory for those students and interested readers studying the subject

Prehistoric Woodworking Rob Sands, 2016-09-16 Rob Sands explores the evidence left by the use of axes on wooden beams and tools found in waterlogged archaeological sites dating over 2000 years old A toolmark can not only inform the archaeologist about the implement used but also provides evidence of building and artifact construction methods

Prehistoric Gold in Europe Giulio Morteani,Jeremy P. Northover,2013-06-29 Interest in the study of early European cultures is growing These cultures have left us objects made of gold other metals and ceramics The advent of metal detectors coupled with improved analytical techniques has increased the number of findings of such objects enormously Gold was used for economic and ceremonial purposes and thus the gold objects are an important key to our understanding of the social and political structures as well as the technological achievements of Bronze and Iron Age European societies A correct interpretation of the information provided by gold and other metal objects requires the cooperation of experts in the fields of social materials and natural science Detailed investigation of gold deposits in Europe have revealed the composition and genesis of the deposits as sources of the metal In Prehistoric Gold in Europe a group of leading European geoscientists metallurgists and archaeologists discuss the techniques of gold mining and metallurgy the socioeconomic importance of gold as coinage and a symbol of wealth and status and as an indicator of religious habits as well as a mirror of trade and cultural relations mirrored by the distribution and types of gold objects in prehistoric times *Prehistoric Flint Mines in Europe*

Werra,2023-11-09 This volume offers a review of major flint mines dating from the Neolithic to the Bronze Age The 18 articles were contributed by archaeologists from Belgium France Germany Great Britain Hungary Italy the Netherlands Poland Spain and Sweden using the same framework to propose a uniform view of the mining phenomenon **Climate and Cultural Change in Prehistoric Europe and the Near East**

Peter F. Biehl,Olivier P. Nieuwenhuyse,2016-11-23 The subject of climate change could hardly be more timely In Climate and Cultural Change in Prehistoric Europe and the Near East an interdisciplinary group of contributors examine climate change through the lens of new archaeological and paleo environmental data over the course of more than 10 000 years from the Near East to Europe Key climatic and other events are contextualized with cultural changes and transitions for which the authors discuss when how and if changes in climate and environment caused people to adapt move or perish More than this

publication of crucial archaeological and paleo environmental data however the volume seeks to understand the social political and economic significance of climate change as it was manifested in various ways around the Old World Contrary to perceptions of threatening global warming in our popular media and in contrast to grim images of collapse presented in some archaeological discussions of past climate change this book rejects outright societal collapse as a likely outcome Yet this does not keep the authors from considering climate change as a potential factor in explaining culture change by adopting a critical stance with regard to the long standing practice of equating synchronicity with causality and explicitly considering alternative explanations

Allen, 2023-06-01 Between 2018 and 2019 Cornwall Archaeological Unit undertook two projects at Mount s Bay Penwith The first involved the excavation of a Bronze Age barrow and the second environmental augur core sampling in Marazion Marsh Both sites lie within an area of coastal hinterland which has been subject to incursions by rising sea levels Since the Mesolithic an area of approximately 1 kilometer in extent between the current shoreline and St Michael s Mount has been lost to gradually rising sea levels With current climate change this process is likely to occur at an increasing rate Given their proximity the opportunity was taken to draw the results from the two projects together along with all available existing environmental data from the area For the first time the results from all previous palaeoenvironmental projects in the Mount s Bay area have been brought together Evidence for coastal change and sea level rise is discussed and a model for the drowning landscape presented In addition to modeling the loss of land and describing the environment over time social responses including the wider context of the Bronze Age barrow and later Bronze Age metalwork deposition in the Mount s Bay environs are considered The effects of the gradual loss of land are discussed in terms of how change is perceived its effects on community resilience and the construction of social memory and narratives of place The volume presents the potential for nationally significant environmental data to survive which demonstrates the long term effects of climate change and rising sea levels and peoples responses to these over time

The Prehistoric Burial Sites of Northern Ireland Harry Welsh, June Welsh, 2014-07-28 Much has been written about the history of Northern Ireland but less well known is its wealth of prehistoric sites particularly burial sites from which most of our knowledge of the early inhabitants of this country has been obtained

Modelling Human-Environment Interactions in and beyond Prehistoric Europe Samuel Seuru, Benjamin Albouy, 2023-07-25 This book offers insight into the relationship between prehistoric and protohistoric human populations and the world around them It reconstructs key aspects of the palaeoenvironment from large scale drivers of environmental conditions such as climate to

more regional variables such as vegetation cover and faunal communities The volume underscores how computational archaeology is leading the way in the study of past human environment interactions across spatial and chronological scales With the increased availability of high resolution climate models agent based modelling palaeoecological proxies and the mature use of Geographic Information System in ecological modelling archaeologists working in interdisciplinary settings are well positioned to explore the intersection of human systems and environmental affordances and constraints These methodological advancements provide a better understanding of the role humans played in past ecosystems both in terms of their impact upon the environment and in return the impact of environmental conditions on human systems They may also allow us to infer past ecological knowledge and land use patterns that are historically contingent rather than environmentally determined This volume gathers contributions that combine reconstructions of past environments and archeological data with a view to exploring their complex interactions at different scales and invites scholars from varying disciplines and backgrounds to present and compare different modelling approaches

The Dover Bronze Age Boat Peter Clark, 2013-02-15 Tells the dramatic story of the discovery in 1992 of the perfectly preserved remains of a large prehistoric sewn plank boat in Dover a unique find of a boat capable of cross channel sailing It includes carefully researched reconstruction drawings

Radiocarbon Dating R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor's seminal book Radiocarbon Dating An Archaeological Perspective It covers the major advances and accomplishments of the ^{14}C method in archaeology and analyzes factors that affect the accuracy and precision of ^{14}C based age estimates In addition to reviewing the basic principles of the method it examines ^{14}C dating anomalies and means to resolve them and considers the critical application of ^{14}C data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology This volume again a benchmark for ^{14}C dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record
