**Ephemeral City** Barrie Scardino, Bruce C. Webb, 2003-12-01 Praise for Cite The Architecture and Design Review of Houston I find Cite to be thorough imaginative always stimulating and responsive to the diversity of the Houston community I hope to see it continue I hope to see it flourish Larry McMurtry Cite is one of the liveliest and most interesting journals on architecture and urbanism that is being produced today Robert Brueggemann Professor and Chair Art History Department and School of Architecture University of Illinois at Chicago Cite has become an important national publication for it situates local and regional culture within the context of national and global issues Thus it provides an antidote to provincialism on the one hand and to excessively abstract globalism on the other Put differently Cite proves that local concerns need not be parochial while national or global trends have multiple variations Gwendolyn Wright Professor Graduate School of Architecture and Planning Columbia University In my judgment this magazine is competitive with any in the United States that focuses on architecture and the built environment Kenneth T Jackson Jacques Barzun Professor of History and the Social Sciences Columbia University I know of few other publications in America that have so consistently and at such a perceptive and sophisticated level promoted high quality design as a mission of education and improvement I am devoted to it and read every issue with great interest though I live a half continent away Laurie D Olin FASLA Hon AIA FAAR Practice Professor of Landscape Architecture Graduate School of Fine Arts University of Pennsylvania Built around characteristic features of modern life such as rapid change built in obsolescence indeterminacy media orientation a culture of style and instant gratification Houston is an ephemeral city hard to pin down and understand Its lack of zoning Houston is the only major city in America without it and a burgeoning population that doubles every generation have created a new urban paradigm where displacements of traditional patterns of stability and urban ritual are now the norm Since 1982 Cite The Architectural and Design Review of Houston has explored the nature of Houston s evolution as an urban place by publishing commissioned articles by nationally known writers and architectural historians and high quality photography This volume brings together twenty five exceptional articles from Cite s first twenty years along with 224 black and white

photographs maps and plans The book is divided into three sections Idea of the City edited by Bruce C Webb Places of the City edited by Barrie Scardino and Buildings of the City edited by William F Stern The sections are introduced with new essays written by the editors to provide cohesion for the anthology and commentary on where Houston might be going in the twenty first century Most articles are followed by a brief update and bibliography of related articles published in Cite The editors chose these articles to explore the developmental history and architecture of a flat sprawling free spirited city that is impossible to capture through any one episode or explain through any one place With a diversity of voices and a selection that includes both narrow and broad topics the volume constitutes a collage that captures the essence of a remarkable place inchoate patchwork full of youthful vigor favorable to private enterprise and one of the world s most fascinating cities

*Designing the New Museum* James Grayson Trulove,2000 Museums have emerged as major travel destinations for millions of travelers and every major city is adding to an existing museum or planning a new one to compete as a world cultural center What s new about museum visitors today is that it is not only the collections and shows they are coming to see it is also the museum building itself Cities are quickly learning that a new museum or an addition by a world class architect can do more to generate tourism than can the acquisition of a major piece of art This unprecedented collection takes a look at the new museums and museum builders Presenting in detail a selection of museums which have been built in the past five years or are planned for completion over the next five years this book will look at these new museums from a design perspective

**Handbook of Research on Visual Computing and Emerging Geometrical Design Tools** Amoruso, Giuseppe,2016-04-11 Visual computing and descriptive geometry are multidisciplinary fields addressing the handling of images 3D models and other computer graphics These ideas are experiencing a revival due to emergent technologies and applications available to developers Based in traditional forms of design and architecture these fields are currently experiencing a bounty of new research based on old principles The Handbook of Research on Visual Computing and Emerging Geometrical Design Tools seeks to add to this knowledge base by considering these technologies from a designer s perspective rather than reiterating the principles of computer science It combines aspects of geometry and representation with emerging tools for CAD generation and visualization while addressing the digital heritage of such fields This book is an invaluable resource for developers students of both graphic and computer generated design researchers and designers

Bolles + Wilson Lars Lerup, Mirko Zardini, 2003 The Luxor is a significant milestone in the Suvre of Bolles Wilson As a major public building it pursues themes first tested in the 1993 new city library in M nster a characteristic plan form an intervention that redefines its context and a synthesis of the abstract with a spatial warmth an ambience that communicates directly and subliminally to a wide audience base The architecture of this German Australian duo does not fit easily into conventional architectural genres Smallness intimacy and precise details characterise their work just like an increasing number of urban interventions that have made a major impact on cities like Hengelo The Hague or Magdeburg The design of the Luxor Theatre the process of its realisation Bolles Wilson s surrounding urban fields and most importantly the internal life in the building engendered by the architecture are fully presented in this book *Frank O. Gehry* Gottfried Knapp, Christian Richters, 2000 Text in English and German After his deconstructive beginnings in the eighties and nineties Frank Gehry increasingly practised a very plastic form of architecture His expressively sculptural cultural buildings the Vitra Design Museum in Weil am Rhein his project for the Walt Disney Concert Hall in Los Angeles and above all the Guggenheim Museum in Bilbao see Opus 32 have shaped the architectural awareness of our period and provided exemplary artistic alternatives to the architectural canon of Modernism Within Gehry s rapidly growing volume of work the comparatively small energy forum for the Minden Ravensburg Electricity Company EMR plays a particularly striking role insofar as the extraordinarily complex brief almost contradictory functions had to be blended in a very cramped space compelled the architect to use highly differentiated forms and materials In this way something like a primal model of sculptural building emerged a massively fissured subtly lit structure that explains itself inside with amazing naturalness making visitors gasp with its changing spatial situations as an exhibition and events centre exploding all conventions as an office building and

translating the theme of energy into sensual forms by architectural means as the electricity company's technical distribution centre. The old dictum form follows function acquires a new and radical quality in the architecture of the Energieforum. In addition to the presentation of the energy forum in Bad Oeynhausen, this book contains an illustrated survey of all other buildings by Frank Gehry in Europe. **Architect** Ruth Peltason, Grace Ong-Yan, 2017-11-07. In this completely revised and up to date edition, the world's most accomplished architects Gehry, Pei, Meier, Nouvel, Piano and 37 more express their views on creativity, inspiration and legacy in this visually stunning one of a kind collection. The Pritzker Prize is the most prestigious international prize for architecture. Architect includes all 42 recipients of the Pritzker Prize and captures in pictures and their own words their awe inspiring achievements. Organized in reverse chronological order by laureate, each chapter features four to six of the architect's major works including museums, libraries, hotels, places of worship and more. The text culled from notebooks, interviews, articles and speeches illuminates the architect's influences and inspirations, personal philosophy and aspirations for his own work and the future of architecture. The book includes more than 1000 stunning photographs, blueprints, sketches and CAD drawings. Architect offers an unprecedented view into the minds of some of the most creative thinkers, dreamers and builders of the last three decades and reveals that buildings are political, emotional and spiritual.
