Theory Constantin, Douglas, Nagy, Voiculescu, 1981-01-01 The first of the annual Operator Theory conferences in Timișoara held four years ago was a meeting of operator theory specialists from the National Institute for Scientific and Technical Creation in Bucharest and from the University of Timișoara Since then the participation to these conferences has greatly increased by being attended first by operator theorists from all over the country and since 1978 by an increasing number of foreign mathematicians Thus the 1980 Conference can be regarded as a truly international Operator Theory meeting fifteen countries being represented at it These conferences are conceived as a means to promote the cooperation between specialists in all areas of Operator Theory Among the main topics in 1980 were dilation theory invariant subspaces connections with the theory of C^* algebras subnormal operators multidimensional functional calculus etc Though not included in this volume we would like to mention that in 1980 some special sessions concerning other fields of Functional

Analysis were organized at the Operator Theory conference. The research contracts of the Department of Mathematics of INCREST with the National Council for Sciences and Technology of Romania provided the means for developing the research activity in Functional Analysis; these contracts constitute the general framework for these meetings.
