Russia In Search Of Itself:

Russia in Search of Itself James H. Billington, 2004-03-19 Billington describes the contentious discussion occurring all over Russia and across the political spectrum He finds conflicts raging among individuals as much as between organized groups and finds a deep underlying tension between the Russians attempts to legitimize their new nominally democratic identity and their efforts to craft a new version of their old authoritarian tradition After showing how the problem of Russian identity was framed in the past Billington asks whether Russians will now look more to the West for a place in the common European home or to the East for a new Eurasian identity

intelligentsia He endured repeated attacks from ultraconservative anti Semitic circles inside the Orthodox Church Fr Men represented the spiritual vision of an open non authoritarian Christianity and his lectures were extremely popular He was murdered on September 9 1990 For years his work was unavailable in most church bookstores in Russia and his teachings were excoriated by some both within and outside the church But his books continue to offer hope to many throughout the world they have sold millions of copies and are testimony to his continuing relevance and enduring significance This

Refugee Policy, and State Building in Postcommunist Europe Oxana Shevel,2011-10-24 Why do similar postcommunist states respond differently to refugees Why do some states privilege certain refugee groups while other states do not This book presents a theory to account for this puzzle and it centers on the role of the politics of nation building and of the office of the UN High Commissioner for Refugees UNHCR A key finding of the book is that when the boundaries of a nation are contested and thus there is no consensus on which group should receive preferential treatment in state policies a political space for a receptive and nondiscriminatory refugee policy opens up The book speaks to the broader questions of how nationalism matters after communism and under what conditions and through what mechanisms international actors can influence domestic policies The analysis is based on extensive primary research the author conducted in four languages in the

Czech Republic Poland Russia and Ukraine *Freedom of Speech in Russia* Daphne Skillen, 2016-11-25 This book traces the life of free speech in Russia from the final years of the Soviet Union to the present It shows how long cherished hopes for an open society in which people would speak freely and tell truth to power faded under Gorbachev's glasnost how free speech was a real if fractured achievement of Yeltsin's years in power and how easy it was for Putin to reverse these newly won freedoms imposing a patrimonial media that sits comfortably with old autocratic and feudal traditions The book explores why this turn seemed so inexorable and now seems so entrenched It examines the historical legacy and Russia's culturally ambivalent perception of freedom which Dostoyevsky called that terrible gift It evaluates the allure of western consumerism and Soviet era illusions that stunted the initial promise of freedom and democracy The behaviour of journalists and their apparent complicity in the distortion of their profession come under scrutiny This ambitious study covering more than 30 years of radical change looks at responses from above and from below and asks whether the players truly understood what was involved in the practice of free speech **Canadian Slavonic Papers**, 2004 **Computational Science - ICCS**

arrangement of platform capital and its modes of re abstraction of race into its fibres and terrains of re territorialization of the human spheres of social economic and political life If capitalism reframed and consolidated racialization through its re territorialization and primitive accumulation producing continuities from colonization and imperialism platformization and digital capital redrafts and redistributes its racial logic in new modes of reassembling social and economic life through data machine learning algorithms software designs and in tandem its automaticity In learning refining and accelerating its enterprise through the mimetic violence of producing difference racism in the digital age calibrates intimately with power Western rationality and the ubiquity of technologies within the everyday If the non hominization of alterity relied on discoveries of science and its conflations with truth and White supremacy the sustained production and oppression of the inferior other co opted automaticity and technologies reiterating our fascination with and our understanding of human progress as pegged to machines as entities working in excess of human cognition and comprehension connecting and responding to its ambient intelligence despite its material absence The book underpins the configuration of power and White supremacy through its co enterprise with technologies seeks to provide an alternative and decolonial approach to technology studies particularly new media and digital technological advancements leveraging on the notion of the digital age as an era of acceleration of difference experimentation and the production of alterity through overt and covert modes of surveillance image recognition software and algorithms which work in complicity with racial capital
